Us Army Security Cooperation Toward Improved Planning And Management:

U.S. Army Security Cooperation Thomas S. Szayna, 2004 In the realm of security cooperation peacetime activities undertaken by the U S armed services with other armed forces and countries the U S Army s current planning process is exceedingly complex and difficult to coordinate control and measure This monograph seeks to help the U S Army improve its ability to assess future demand for resources devoted to security cooperation and to evaluate the impact of these demands upon the resources available to the Army *U.S. Army Security Cooperation: Toward Improved Planning and Management*, 2004 This monograph documents the results of a project entitled Army Capabilities to Respond to Future Engagement Requirements The project aimed to improve the Army s decisionmaking and prioritization of resources devoted to security cooperation The research reported here was sponsored by the Deputy Under Secretary of the Army International Affairs Toward the end of the project s duration that office was disestablished and its functions split up and merged into the Office of the Assistant Secretary of the Army Acquisition Logistics and Technology and the Office of the Deputy Chief of Staff G 3 Operations and Plans Headquarters Department of the Army The research was conducted in RAND Arroyo Center s Strategy Doctrine and Resources Program RAND Arroyo Center part of the RAND Corporation is a federally funded research and development center sponsored by the United States Army The report should be of interest to those concerned with security cooperation and Army international activities

Air Power in the New Counterinsurgency Era Alan Vick, 2006 United States has engaged in counterinsurgency around the globe for more than a century But insurgencies have rarely been defeated by outside powers Rather the afflicted nation itself must win the war politically and militarily and the best way to help is to offer advice training and equipment Air power and the U S Air Force can play an important role in such efforts which suggests making them an institutional priority

After Two Wars: Reflections on the American Strategic Revolution in Central Asia, 2005 Since September 11 2001 the United States has fought two wars in Iraq and Afghanistan In these wars the United States has accomplished or more precisely revealed a strategic revolution Most notably U S led coalitions sustained forces in Central Asia and the Caucasus over an extended period by sea and air for the rst time in history Thus American leaders and commanders revealed that the new military capabilities hitherto associated with the Revolution in Military Affairs RMA could be deployed anywhere in the world that U S forces would and could be optimized for global power projection capabilities and that new theaters like Central Asia were of considerable strategic importance to Washington Their actions rejected a parallel to the ongoing Revolution in Strategic Affairs RSA that reformed the importance of that area as a potential theater of strategic operations a term taken originally from Soviet military thought

Building Partner Capabilities for Coalition Operations Jennifer D. P. Moroney, Nancy E. Blacker, Renee Buhr, James McFadden, Cathryn Quantic Thurston, 2007-07-03 Ongoing operations and emerging mission requirements place a heavy burden on Army resources resulting in capability gaps that the Army is unable to fill by itself One solution is to build the appropriate

capabilities in allies and partner armies through focused security cooperation To do this Army planners need a more comprehensive understanding of the capability gaps and a process for matching those gaps with candidate partner armies

Building Militaries in Fragile States Mara E. Karlin, 2018-01-19 With a rich comparative case study approach that spans Europe Asia and the Middle East Building Militaries in Fragile States unearths provocative findings that suggest the traditional way of working with foreign militaries needs to be rethought

Defence Diplomacy in the Long War Patrick Blannin, 2017-08-28 One of the most dominant security issues of the twenty first century has been the US led battle against transnational terrorism the aptly named Long War Over the past fifteen years the Long War has been examined using multiple perspectives However one central mechanism is missing in current Long War analyses defence diplomacy Defence diplomacy enhances the diplomatic and security capacity of a state providing the only link between executive office and the ministries of foreign affairs and defence two vital institutions in the Long War Using a case study of US defence diplomacy in Afghanistan from 2001 to 2014 the paper argues simply that the practice of defence diplomacy far outweighs current theories on what it is how it works and why it matters The paper aims to generate a more nuanced understanding of defence diplomacy as well as identify it as a key component of the US CT COIN strategy to achieve their Long War policy objectives

Short of General War Harry Richard Yarger, Army War College (U.S.). Strategic Studies Institute, 2010 At the end of the first decade of the 21st century the United States is involved in two ongoing wars faces a significant international terrorist threat and is witnessing an escalation of international resistance to its leadership of the global world order Looking out to 2025 many see the potential for a prolonged period of instability as a result of competing economic models demographics the rise of new international actors and the resurgence old ones climate change and the scarcity of resources The range of stability challenges will stretch the capabilities of any military force structure and require innovative thinking on the part of policymakers and military professionals alike on the appropriate development and use of the military element of power In this anthology 16 students of the U S Army War College Class of 2008 offer their perspectives on the use of military power across the spectrum of conflict in the 21st century short of or following general war and provide insights into the necessary force structure policy strategy and doctrinal approaches for future success Beyond a focus on operations short of general war these writings share in common a worthwhile idea or set of ideas that can materially contribute to how the U S military can best conduct full spectrum operations Collectively these essays reveal the innovative thinking and diversity and depth of thought of the U S and foreign military and civilian agency personnel that comprise each student body at the U S Army War College as they prepare themselves to become senior leaders and fulfill their roles in their militaries or agencies This resource offers 16 students of the U S Army War College Class of 2008 perspectives and forecasts for the use of military power through year 2025 Scholars and policymakers alike may find these essays beneficial for long term strategy planning Related products Navies and Soft Power Historical Case Studies of Naval Power and the Nonuse of Military Force can be
