New Dynamics in US-China Relations Mingjiang Li, Kalyan M. Kemburi, 2014-10-17 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies as well as to play the leading role in maintaining peace and stability in the region. However, Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region, these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia-Pacific alongside the strategies employed in the management of this relationship. In turn, it illuminates the sources of conflict and cooperation in US-China relations, looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic forces, and Taiwan. Finally, it explores the role of regional states in shaping US-China relations and, in doing so, covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar, and Cambodia. With chapters from leading scholars and analysts, this book deals with a diverse range of issues, including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security, and how Asian states view their relations with the US and China respectively. *New Dynamics in US-China Relations* will be of huge interest to students and scholars of Asian politics, US politics, international relations, and security studies, as well as practitioners involved in framing and implementing foreign security and economic policy pertaining to the Asia-Pacific.

The Role of American NGOs in China's Modernization Norton Wheeler, 2013. In the waning years of the Cold War, the United States and China began to cautiously engage in cultural, educational, and policy exchanges which, in turn, strengthened new security and economic ties. These links have helped shape the most important bilateral relationship in the late twentieth and early twenty-first centuries. This book explores the dynamics of cultural exchange through an in-depth historical investigation of three organizations at the forefront of US-China non-governmental relations: the Hopkins-Nanjing Center for Chinese and American Studies, the National Committee on United States-China Relations, and The 1990 Institute. Norton Wheeler reveals the impact of American non-governmental organizations (NGOs) on education, environment, fiscal policy, and civil society in contemporary China. In turn, this book illuminates the important role that NGOs play in complementing formal diplomacy and presents a model of society-to-society relations that moves beyond old debates over cultural imperialism. Finally, the book highlights the increasingly significant role of Chinese Americans as bridges between the two societies. Based on extensive archival research and interviews with leading American and Chinese figures, this book will be of interest to students and scholars of Chinese politics and history, international relations, and transnational NGOs.

Hinck, Skye Cooley, Randolph Kluver, 2019-06-13 In order to better understand how the world viewed the US 2016 presidential election the issues that mattered around the world and how nations made sense of how their media systems constructed presentations of the presidential election Robert S Hinck Skye C Cooley and Randolph Kluver examine global news narratives during the campaign and immediately afterwards Analyzing 1 578 news stories from 62 sources within three regional media ecologies in China Russia and the Middle East Hinck Cooley and Kluver demonstrate how the US election was incorporated into narrative constructions of the global order They establish that the narratives told about the US election through national and regional media provide insights into how foreign nations construct US democracy and reflect local understandings regarding the issues and impacts of US policy towards those nations Avoiding jargon laden prose *Global Media and Strategic Narratives of Contested Democracy* is as accessible as it is wide ranging Its empirical detail will expand readers understanding of soft power as narrative articulations of foreign nation s policies values and beliefs within localized media systems Communication media studies students as well as political scientists whose studies includes media and global politics will welcome its publication

America's Challenge Michael D. Swaine, 2012-05-01 The emergence of the People s Republic of China on the world scene constitutes the most significant event in world politics since the end of World War II As the world s predominant political economic and military power the United States faces a particularly significant challenge in responding to China s rising power and influence especially in Asia Offering a fresh perspective on current and future U S policy toward China Michael Swaine examines the basic interests and beliefs behind U S China relations recent U S and Chinese policy practices in seven key areas and future trends most likely to affect U S policy American leaders he concludes must reexamine certain basic assumptions and approaches regarding America s position in the Western Pacific integrate China policy more effectively into a broader Asian strategy and recalibrate the U S balance between cooperative engagement and deterrence toward Beijing
