Social Networks, Border Regions and Local-Global Relations* Angela Pilch Ortega,Barbara Schröttner,2012 Globalization has encouraged worldwide mobility intensified migration and supported growing interconnectedness through new technologies it has therefore substantially contributed to the development of so called transnational spaces This volume focuses on transnational spaces which should not be understood as locations on a map or as sealed containers but instead as relational social areas which are composed of various relationships Transnationalization increases liberation and or emancipation from place because social relations overcome physical space and local regional and national boundaries As a consequence a reconfiguration of social cultural political and economic scopes of action occurs This volume reveals that for people in general and for migration movements in particular new borders have been established in many places all over the world The biographies of global actors and migrants reference this alteration of space Additionally this volume calls special attention to border regions and their social configurations Borders appear as narratives which can have an enormous impact on social structures This book further deals with different aspects and various tensions having to do with local and global change interplay and interdependence Globalization leads to development that often ignores regional needs supports the continuation of post colonial power and

Assimakopoulos, 2017-11-09 This book analyses the relationships among product safety strategy and culture concurrent engineering new product development NPD processes and product safety performance Product safety is a matter of enormous economic and societal concern given the safety risks to consumers and the financial risks to producers Nevertheless a thorough conceptual understanding of the effects of NPD policies and practices is still largely missing as several large scale trends have made clarifying the role of product safety in its socio economic context difficult including the rise of consumerism and the shift in the balance of power from manufacturers to customers and regulators the internationalization of value chains and the fragmentation of markets worldwide and technological change leading to a sophistication of products that rendered average consumers increasingly unaware of risk and potential accidents This volume sets out to close the gaps among research practice and policy with an emphasis on advocating responsible product innovation Through an in depth study of the durable juvenile products industry the authors discover important relationships for example that top management involvement safety first culture and robust NPD processes are paramount in increasing product safety and decreasing product recalls in firms On the other end of the spectrum concurrent engineering does not automatically lead to product safety they found no magic bullet through which product safety can be tied to the use of a particular tool skill or practice Offering a dynamic framework for aligning the interests of multiple stakeholders including manufacturers regulators and consumers the authors provide a clearer understanding of product safety and its implications for scholars students policy makers and practitioners in the areas of innovation management product management R D management and responsible research and innovation **Health Planning Reports Personal Author Index** United States.
