Driving from Japan Wanda James, 2015-08-13. This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan, the arrival of Japanese cars in California in the late 1950s, consumer and media reactions to Japanese manufacturers, what obstacles they faced, initial sales, and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun, Nissan, Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally sound vehicle.

The bubble burst in the 1990s, and a decade of recession led to numerous changes in Japanese society and management. J Management: Fresh Perspectives on the Japanese Firm in the 21st Century presents a comprehensive overview of the reforms and changes in the Japanese economy and their impact on management processes. J Management gives insights into the current situation of Japanese firms, explains Japanese views on current developments, and answers questions about contemporary Japanese firms, such as: How have Japanese firms handled the recession and how have they reinvented themselves after it? Is lifetime employment still relevant in today's Japanese society? Does the seniority system still apply? How has globalization impacted today's Japanese corporations? How advanced is gender equality in the J firm? What challenges do foreign workers face in the J company? Written by students at Sophia University in Tokyo, J Management not only contains an overview of relevant sources on the topics but also includes the personal experiences and opinions of these young international writers who provide comprehensive, fresh, and insightful commentary from the Japanese perspective.
