Computer Applications in Near Net-Shape Operations Andrew Y.C. Nee, Soh K. Ong, Yun G. Wang, 2012-12-06 Having edited *Journal of Materials Processing Technology* previously entitled *Journal of Mechanical Working Technology* for close on 25 years I have seen the many dramatic changes that have occurred in the materials processing field. Long gone are the days when the only materials processing carried out was virtually the forming of conventional metals and alloys and when the development of a new product or process in a great number of cases called for several months of repetitive trial and error with many mostly intuition or experience based expensive and time consuming modifications being made to the dies until success was achieved. Even when a successful product was formed its mechanical properties in terms of springback and dimensional accuracy thickness variations residual stresses surface finish etc remained to be determined. Bulk forming operations usually required expensive machining to be carried out on the product to impart the required dimensional accuracy and surface finish. Over the years the experience based craft of metal forming has given way to the science of materials processing. With the use of the computer forming operations can be simulated with accuracy to determine the best forming route and the associated forming loads and die stresses and to predict the mechanical properties of the formed product even down to its surface texture.

Machine Tools Production Systems 1 Christian Brecher, Manfred Weck, 2024-04-12 The first part of the *Machine Tools and Production Systems Compendium* presents the wide range of machine tools and a comprehensive overview of different machine types. Based on the categorization of manufacturing processes according to the German standard DIN 8580 the different areas of application of machine tools are delineated and the various machine designs the mechanical structure as well as the functions of the machine types are explained. Numerous three dimensional illustrations of the principles color photos section drawings and schematic diagrams supplement the explanations and provide visual support. First the machine types for the different manufacturing processes are described before the multi machine systems are explained. This is followed by a detailed presentation of the various equipment components of machine tools. In the last newly introduced chapter the volume is concluded by a comprehensive and detailed explanation of three design examples of selected machine tools based on assembly drawings. The German Machine Tools and

Production Systems Compendium has been completely revised The previous five volume series has been condensed into three volumes in the new ninth edition with colored technical illustrations throughout This first English edition is a translation of the German ninth edition **NASA Tech Briefs** ,2008 *August 2022 - Surplus Record Machinery & Equipment Directory* Surplus Record,2022-08-01 SURPLUS RECORD is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 95 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more Over 1 100 businesses list with the SURPLUS RECORD August 2022 issue Vol 99 No 8 *August 2023 - Surplus Record Machinery & Equipment Directory* Tom Scanlan, SURPLUS RECORD is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 110 000 industrial assets since 1924 including metalworking and fabricating machine tools lathes cnc equipment machine centers woodworking equipment food equipment chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more Over 1 100 businesses list with the SURPLUS RECORD August 2023 issue Vol 100 No 8
