## **Uncommon Beings Irrational:**

*Uncommon Beings* Samantha Lee, 2018-11-27 Live like there s no tomorrow That s the motto Annie lived by and used to encourage her best friend to stop waiting for their cancer to finally kill them Jasmine and Annie have been best friends since their parents enrolled them in a cancer research program when they were little Though the treatments have been grueling and both have suffered multiple setbacks they have surpassed the life expectancy rate for their type of cancer Now adults Annie wants out of the program so she can try to have some semblance of a normal life as long as she can Jasmine has come to accept that surviving cancer is all that they are meant to do and therefore does not understand why Annie would just give up She wants desperately to convince her best friend to reenter the program but how can she when she herself does not believe there s anything in life worth fighting for Derrick lost the love of his life in a vicious attack years ago He abandoned his family his life and his feelings in order to cope with the losing Antanasia Now back at least physically with his family he still struggles to deal with his emotions He spends his days existing by running Canyon Corp and avoiding any quality time with his family Derrick doesn t understand why his family will not just let him be He believed just being present would make them happier than being gone again For him a life of feelings or emotions was worse than death And death for a vampire does not come easily When Jasmine and Derrick met they knew instantly there was a connection Jasmine tried to ignore it because all she wanted to do was save her best friend Derrick was against feeling anything yet no matter how hard he tried he could not keep her out of his mind Once he learned of her cancer he was shocked that he only felt more compelled to be with her He knew vampires could cure a lot of things but cancer was not one of them He questioned why he would want to fall for someone so frail and risk the chance of more pain when he eventually lost her Personal struggles mixed with a past long thought dead are more than enough to prevent these two from being together Jasmine struggles to understand her feelings for Derrick Guilt fascination fear and excitement are on endless repetition in her mind and heart She comes to understand what Annie has been preaching to her all these years but it may be too late Derrick yearns to understand why after all these years this fragile little human would be the one to awaken emotions he buried decades ago He will need his family if his relationship with Jasmine is to survive but believes he may have done too much damage to receive any of their help

Uncommon Decency Richard J. Mouw, 2011-08-29 Few if any people in the evangelical world have conversed as widely and sensitively as Richard Mouw That s why Mouw can write here so wisely and helpfully about what Christians can appreciate about pluralism the theological basis for civility and how we can communicate with people who disagree with us on the issues that matter most

**On Being Unreasonable** Kirsty Sedgman, 2023-02-14 Manners order and respect these are all ideals we subscribe to In opposed positions we ought to be able to agree to disagree Today s world is built from structures of standards and reason but it is imperative to ask who constructed these norms and why We are more divided than ever before along lines of race gender class disability and it s time to question who benefits the most What if our

propensity to measure human behaviour against rules and reason is actually more problematic than it might seem Kirsty Sedgman shows how power dynamics and the social biases involved have resulted in a wide acceptance of what people should and shouldn't do but they create discriminatory realities and amount to a societal facade that is dangerous for genuine social progress From taking the knee to breastfeeding in public from neighbourhood vigilantism to the Colston Four and exploring ideas around ethics justice society and equality along the way Sedgman explores notions of civility throughout history up to now On Being Unreasonable mounts a vital and spirited defence of why and how being unreasonable can help improve the world It examines and parses the pros and cons of our rules around reason but leaves us with the rousing question What if behaving unreasonably at times might be the best way to bring about meaningful change that is long overdue

**Uncommon Sense** Alan Cromer, 1995-08-24 Most people believe that science arose as a natural end product of our innate intelligence and curiosity as an inevitable stage in human intellectual development But physicist and educator Alan Cromer disputes this belief Cromer argues that science is not the natural unfolding of human potential but the invention of a particular culture Greece in a particular historical period Indeed far from being natural scientific thinking goes so far against the grain of conventional human thought that if it hadn't been discovered in Greece it might not have been discovered at all In Uncommon Sense Alan Cromer develops the argument that science represents a radically new and different way of thinking Using Piaget's stages of intellectual development he shows that conventional thinking remains mired in subjective egocentric ways of looking at the world most people even today still believe in astrology ESP UFOs ghosts and other paranormal phenomena a mode of thought that science has outgrown He provides a fascinating explanation of why science began in Greece contrasting the Greek practice of debate to the Judaic reliance on prophets for acquiring knowledge Other factors such as a maritime economy and wandering scholars both of which prevented parochialism and an essentially literary religion not dominated by priests also promoted in Greece an objective analytical way of thinking not found elsewhere in the ancient world He examines India and China and explains why science could not develop in either country In China for instance astronomy served only the state and the private study of astronomy was forbidden Cromer also provides a perceptive account of science in Renaissance Europe and of figures such as Copernicus Galileo and Newton Along the way Cromer touches on many intriguing topics arguing for instance that much of science is essential complete there are no new elements yet to be discovered He debunks the vaunted SETI Search for Extraterrestrial Intelligence project which costs taxpayers millions each year showing that physical limits such as the melting point of metal put an absolute limit on the speed of space travel making trips to even the nearest star all but impossible Finally Cromer discusses the deplorable state of science education in America and suggests several provocative innovations to improve high school education including a radical proposal to give all students an intensive eighth and ninth year program eliminating the last two years of high school Uncommon Sense is an illuminating look at science filled with provocative observations Whether challenging Thomas Kuhn's

theory of scientific revolutions or extolling the virtues of Euclid's Elements Alan Cromer is always insightful outspoken and refreshingly original

**Karl Jaspers' Theory of Irrationality** Daniel Adsett, 2024-12-16 Defending the view that Karl Jaspers' concept of irrationality *Widervernunft* is better able to account for pathological patterns of individual and collective thinking Karl Jaspers' Theory of Irrationality From Delusions to Worldviews argues that irrationality is incorrigibility a blockage of reason as the will to communication Highlighting the importance of freedom and creativity at the heart of reason *Vernunft* Daniel Adsett analyzes examples of delusional thought through a Jaspersian lens He shows that irrationality arises when we hold to certain attitudes with an incorrigible conviction and refuse to genuinely consider the possibility that we might need to revise or change our beliefs In presenting these arguments Adsett offers a novel contribution to contemporary debates about the character of reason while rehabilitating an often neglected aspect of Jaspers' thought

*Issues in Philosophical Counseling* Peter B. Raabe, 2002-06-30 Raabe examines some of the most perplexing problems a client may present to a counselor and how a philosopher would deal with them He provides a detailed philosophical discussion as well as illustrative case studies of some of the most important issues encountered in any counseling practice The first six chapters discuss philosophical counseling in general terms while the following 15 chapters deal with specific life issues such as the differences between how men and women communicate and how this is relevant to a counseling discussion the role of medication in therapy the concept of normalcy the meaning of life the motivation behind suicide dream interpretation and religious beliefs An important resource for professionals students and scholars involved with philosophical counseling and applied practical philosophy

**The Science of Planetary Signatures in Medicine** Jennifer T. Gehl, 2017-01-27 A comprehensive guide to the cosmic influences that underlie health and how to apply them for profound health and healing Examines how ancient and modern traditions of healing interconnect through the doctrine of signatures As above so below Reveals how one's astrological chart has implications for personal health and healing Explains how each sign of the zodiac corresponds not only to parts of the body and its chakras but also to specific plants herbs colors and emotions Explores how to use sound healing to harmonize astrological imbalances When we look at the vast and intricate cosmos galaxies planets organisms organs cells molecules atoms there is a fundamental order a music or harmony of the spheres Our cells reflect the images of galaxies seen through our telescopes We are the microcosm reflecting the macrocosm of the heavens Our ancestors understood these patterns and

connections between humanity and the universe and developed spiritual and healing traditions in line with these cosmic truths Yet in the 19th century knowledge of these connections was set aside as medical science sought to create the one size fits all approaches to healing that dominate modern medicine today In this comprehensive exploration of the celestial influences that underlie health and healing Jennifer Gehl with Marc Micozzi examines how ancient and modern traditions of healing interconnect through the doctrine of signatures As above so below She reveals how one's celestial nature the arrangement of the cosmos at the moment of birth has implications for personal health and how each sign of the zodiac corresponds to parts of the body the chakras and specific plants herbs colors and emotions She explains how sound rearranges forms according to the principles of harmony leveraging not only the human self regulating capacity to restore health but also that of the Earth to restore balance and harmony Also explored are the recurrence of geometric forms in nature and how to apply this knowledge in sound healing and medical astrology Weaving together the threads of ancient science and spirit that formed the original tapestry of medicine Gehl explains how to restore the cosmic foundations of healing for personal planetary and universal health and wellbeing

**Reason and Ethics** Joel Marks, 2020-10-01 Reason and Ethics defends the theoretical claim that all values are subjective and the practical claim that human affairs can be conducted fruitfully in full awareness of this Joel Marks goes beyond his previous work defending moral skepticism to question the existence of all objective values This leads him to suggest a novel answer to the Companions in Guilt argument that the denial of morality would mean relinquishing rationality as well Marks disarms the argument by conceding the irreality of both morality and logic but is still able to rescue rationality while dispensing with morality on pragmatic grounds He then offers a positive account of how life may be lived productively without recourse to attributions and assertions of right and wrong good and bad and even truth and falsity Written in an accessible and engaging style Reason and Ethics will be of interest to scholars and students working in metaethics as well as to the generally intellectually curious

**Islamic Law and International Law** Emilia Justyna Powell, 2019 Islamic Law and International Law provides a comprehensive comparison of the Islamic legal tradition and international law especially in the context of dispute settlement Do states of the Islamic milieu avoid international courts How do they view mediation and arbitration Is Islamic legal tradition incompatible with international law The answer to the Islamic law international law nexus puzzle lies in the diversity of how secular and religious laws fuse in domestic legal systems across the Islamic milieu States are not Islamic to the same degree or in the same way Consequently different international conflict management methods appeal to different states

**A History of Great Ideas in Abnormal Psychology** T.E. Weckowicz, H. Liebel-Weckowicz, 1990-04-23 As indicated by its title A History of Great Ideas in Abnormal Psychology this book is not just concerned with the chronology of events or with biographical details of great psychiatrists and psychopathologists It has as its main interest a study of the ideas underlying theories about mental illness and mental health in the Western world These are studied according to their historical development from ancient

times to the twentieth century The book discusses the history of ideas about the nature of mental illness its causation its treatment and also social attitudes towards mental illness The conceptions of mental illness are discussed in the context of philosophical ideas about the human mind and the medical theories prevailing in different periods of history Certain perennial controversies are presented such as those between the psychological and organic approaches to the treatment of mental illness and those between the focus on disease entities nosology versus the focus on individual personalities The beliefs of primitive societies are discussed and the development of early scientific ideas about mental illness in Greek and Roman times The study continues through the medieval age to the Renaissance More emphasis is then placed on the scientific revolution of the seventeenth century the enlightenment of the eighteenth and the emergence of modern psychological and psychiatric ideas concerning psychopathology in the twentieth century Dynamics Allegiance Development Michael Watson,2021-02-12 These novels four at stance 1 last editorial PDF for number one of a12 stack Four finished for finals One by one to be released Covers everything from the core of this world to the Big Bang back a gain over the moon off this planet into all truths resolved What others won t talk about what many forget These flowed like magic from intelligence beyond throughout experience from out of the Milky Way Into vast mindset borrowed set caste for forever is ever today is your dream At rest for your for cast forecasters this world **Father Malebranche's treatise concerning the Search after Truth. The whole work compleat. To which is added the author's treatise of Nature and Grace ... together with his answer to the animadversions upon the first volume: his defense against the accusations of Mr. De La Ville,&c., relating to the same subject. All translated by T. Taylor** Nicolas Malebranche,1694 Unreasonable Doubt Norma Thompson,2011 Part detective story part social commentary part intellectual autobiography part philosophical analysis this is a jury book unlike any other Anthony Kronman Sterling Professor of Law and former Dean Yale Law School Norma Thompson teaches us brilliantly and painlessly why judging as opposed to simply knowing is an essential part of a responsible human existence recounting the trials and crimes and moral dilemmas of antiquity and classical tradition in a stunningly original reading Abraham D Sofaer Senior Fellow Hoover Institution and former United States District Judge In 2001 Norma Thompson served on the jury in a murder trial in New Haven Connecticut In Unreasonable Doubt Thompson dramatically depicts the jury s deliberations which ended in a deadlock As foreperson she pondered the behavior of some of her fellow jurors that led to the trial s termination in a hung jury Blending personal memoir social analysis and literary criticism she addresses the evasion of judgment she witnessed during deliberations and relates that evasion to contemporary political social and legal affairs She then assembles an imaginary jury of Tocqueville Plato and Jane Austen among others to show how the writings of these authors can help model responsible habits of deliberation **Co-counselling** Katie Kauffman,Caroline New,2004 The theory behind Co Counselling argues that emotional expression should be welcomed and that human beings can help each other recover from past distress by taking turns giving and receiving attention Benefits of

the method include the acceleration of personal growth and the reduction of the stresses inherent in the practitioner's role. This accessible book offers a serious challenge to much of what is currently considered good practice in mental health services and succeeds in developing a dialogue between co-counselling and other therapeutic approaches. It provides a thorough introduction to the method incorporating recent developments in the field and providing a comprehensive account of both the theory and practice. The reader also benefits from inclusion of clinical material outlining the experiences of people from a range of backgrounds offering evidence of the value of Co-Counselling. Co-Counselling offers a model that has many implications for anyone struggling with emotional problems particularly those recovering from discrimination, prejudice and oppression. Counsellors and psychotherapists will find this book to be an invaluable resource which both challenges and stimulates.

**Unsustainable Oil** Jon Gordon, 2016-04-15 Sustainable development is for government and industry at least primarily a way of turning trees into lumber, tar into oil and critique into consent, a way to defend the status quo of growth at any cost from the Introduction. In *Unsustainable Oil: Facts, Counterfactuals and Fictions* Jon Gordon makes the case for re-evaluating the theoretical, political and environmental issues around petroleum extraction. Doing so, he argues, will reinvigorate our understanding of the culture and the ethics of energy production in Canada. Rather than looking for better facts or better interpretations of the facts, Gordon challenges us to embrace the future after oil. Reading fiction can help us understand the cultural ecological crisis that we inhabit. In *Unsustainable Oil*, using the lens of Alberta's bituminous sands, he asks us to consider literature's potential to open space for creative alternatives.
