Ian Cunningham, Philip James

Voluntary Sector Organizations And The State Voluntary Sector Organizations And The State:

Voluntary Sector Organizations and the State Rachel Laforest, 2011-11-01 In the early 1990s voluntary organizations garnered little attention in Canadian policy circles even though the federal government was simultaneously offloading its responsibility for essential services to the sector and cutting back their funding Two decades later the voluntary sector is a key public policy player in federal provincial and municipal politics Rachel Laforest shows why this turnaround represents a significant shift in the way citizens and policy makers view the place of voluntary organizations in public policy Members of voluntary organizations have struggled for a stronger voice in policy making and redefined their relationship to the federal government through key collaborations such as the Voluntary Sector Initiative This deft account of how a loose coalition of voluntary organizations was transformed into a distinct sector offers a new conceptual framework for explaining dynamic state voluntary sector relations at all levels of government *The Shadow State* Jennifer R. Wolch, 1990

The State and Civil Society Nicole Bolleyer, 2018-10-18 State regulation of civil society is expanding yet widely contested often portrayed as illegitimate intrusion Despite ongoing debates about the nature of state voluntary relations in various disciplines we know surprisingly little about why long lived democracies adopt more or less constraining legal approaches in this sphere in which state intervention is generally considered contentious Drawing on insights from political science sociology comparative law as well as public administration research this book addresses this important question conceptually theoretically and empirically It addresses the conceptual and methodological challenges related to developing systematic comparative insights into the nature of complex legal environments affecting voluntary membership organizations when simultaneously covering a wide range of democracies and the regulation applicable to different types of voluntary organizations Proposing the analytical tools to tackle those challenges it studies in depth the intertwining and overlapping legal environments of political parties interest groups and public benefit organizations across 19 long lived democracies After presenting an innovative interdisciplinary theoretical framework theorizing democratic states legal disposition towards or their disinclination against regulating voluntary membership organizations in a constraining or permissive fashion this framework is empirically tested Applying Qualitative Comparative Analysis QCA the comparative analysis identifies three main paths accounting for the relative constraints in the legal environments democracies have created for organized civil society defined by different configurations of political systems democratic history their legal family and voluntary sector traditions Providing the foundation for a mixed methods design three ideal typical representatives of each path Sweden the UK and France are selected for the in depth study of these legal environments long term evolution to capture reform dynamics and their drivers that have shaped group and party regulation over many decades

Handbook on Society and Social Policy Nicholas Ellison, Tina Haux, 2020-07-31 This comprehensive Handbook provides a unique overview of the key issues and challenges facing society and social policy in the twenty first century discussing how welfare is conceptualised organised and delivered

in contemporary global society Chapters engage with specific areas of social policy as well as with the social divisions and institutional infrastructures that underpin them The Handbook also considers how social policy should respond to the challenges posed by austerity human migration and the climate crisis Government and the Third Sector Benjamin Gidron,Ralph M. Kramer,Lester M. Salamon,1992-05-08 In ten chapters written expressly for this book international experts in economics political science sociology and social welfare examine the position of the third sector vis a vis government in European countries and Israel revealing the growing interdependence of the public and voluntary sectors The conventional wisdom assumes a basic conflict between the voluntary sector and the state The authors of this volume show that far from competing with government nonprofit organizations provide an alternative set of mechanisms through which to deliver publicly financed services In many countries for example partnerships between local government and voluntary organizations are thriving The authors put the current debate over the relative roles of government and the nonprofit sector into perspective by examining how the relationship between them has developed evaluate the possibilities for cooperation between nonprofits and the state in coping with current social needs assess the extent to which nonprofit organizations can assume new burdens and explore in different national settings the evolving relationship between the nonprofit sector and the state which has come to be a central issue in the political discourse of our day **The Nonprofit Sector in International Perspective** Estelle James,1989 Publisher Description **Scandinavian Civil Society and Social Transformations** Bernard Enjolras,Kristin Strømsnes,2018-04-11 This book aims at presenting a conceptual apparatus and empirical analysis of the ways Nordic civil society is affected by social transformations by focusing on the Norwegian case The Norwegian empirical focus allows identifying processes and factors of change that are relevant outside this context and enable us to understand on a more general basis the relationship between social transformations and transformations affecting the voluntary sector This book will make an original contribution to the field of comparative civil society studies both by increasing the available knowledge on the Nordic civil society model and by analyzing the societal transformations affecting civil society over time **The Neo-liberal State** Raymond Plant,2010 There is a world wide debate at the moment about the appropriate role for the state in modern societies in the light of the world financial crisis This book provides a comprehensive analysis and critique of Neo liberal or economic liberal ideas on this issue **The Voluntary Sector in the United Kingdom** Jeremy Kendall,Martin Knapp,1996 This book provides an analytical overview of the vast range of historiography which was produced in western Europe over a thousand year period between c 400 and c 1500 Concentrating on the general principles of classical rhetoric central to the language of this writing alongside the more familiar traditions of ancient history biblical exegesis and patristic theology this survey introduces the conceptual sophistication and semantic rigour with which medieval authors could approach their narratives of past and present events and the diversity of ends to which this history could then be put By providing a close reading of some of the historians who put these linguistic principles

and strategies into practice from Augustine and Orosius through Otto of Freising and William of Malmesbury to Machiavelli and Guicciardini it traces and questions some of the key methodological changes that characterise the function and purpose of the western historiographical tradition in this formative period of its development *The State, Institutional Pluralism, and Development from Below* James V. Riker, 1998 *The Role of Civic Organizations in the Provision of Social Services* Mark Robinson, Gordon White, 1997 *The Role of Civic Organizations in the Provision of Social Services Towards Synergy* assesses the relative strengths limitations of civic organizations as providers of social services Researchers policy makers who are searching for better ways of organizing social service provisions in developing countries will find this publication of great interest The publication is part of the Research for Action series which discusses policy oriented research on the main strategic issues of development international cooperation as well as on the interaction between domestic global changes

Voluntary Organisations and Public Service Delivery Ian Cunningham, Philip James, 2011 This volume draws together a team of expert contributors to explore how the process of outsourcing is impacting the internal and external labour markets of voluntary organisations and the implications for the policy objectives underlying the externalisation of the delivery of public services to them **The Voluntary Sector, the State, and Social Work in Britain** Jane E. Lewis, 1995 The story of welfare politics in Britain has usually been told in terms of a simple shift from individualism to collectivism and ever increasing amounts of state intervention *The Voluntary Sector the State and Social Work in Britain* offers a different perspective which shows that Britain has always had a mixed economy of welfare with the voluntary sector playing a major role This book traces the ideas and practice of one of the most influential voluntary organisations the Charity Organisation Society which became the Family Welfare Association in 1946 It examines the meaning of voluntary personal social service which became social work and the nature of the shifting balance in social provision between the voluntary and statutory sectors from the late nineteenth to the twentieth century By taking a long view this volume highlights the important shift in the meaning of partnership between the state and voluntary sectors from the separate spheres philosophy of the late nineteenth century to the more complementary supplementary relationship of the mid twentieth century and finally to the pressure now being exerted on voluntary organisations to become alternative providers of social services Through the history of the Family Welfare Association the book traces the development of social work from voluntary work which was seen as integral to ideas about social theory and social change to professional practice which was forced to seek new relationships with the state and voluntary sector As well as presenting a substantial history of a very significant charitable organisation this important book analyses the nature of welfare provision over time and provides an in depth treatment of the development of principles and concepts relevant to current debates **The Foundations of the Welfare State** Robert E. Goodin, Deborah Mitchell, 2000 This three volume compendium reproduces all the key texts on the welfare state its rise and fall its varying rationales and instrumentalities its different forms in different periods and different places Political history

and social theory are interspersed with sociology and economics and neo liberal analyses sit alongside socialist and feminist ones making for an invigorating blend of opposing perspectives Anglo American experiences are contrasted not just with those of Germany and Scandinavia but also with Japan and Taiwan Italy and Hungary Australia and South Asia thus highlighting the many distinct styles of welfare states and the distinctive social economic political and cultural forces driving them The juxtaposition of all the standard texts alongside many others which are deeply revealing but virtually unknown makes this an indispensable reference source for all serious students of the welfare state

Regulatory Waves Oonagh B. Breen, Alison Dunn, Mark Sidel, 2016-12-22 All governments in various ways regulate and control nonprofit organizations Nongovernmental organizations NGOs while hopeful of supportive regulatory environments are simultaneously seeking greater autonomy both to provide services and to advocate for policy change In part to counter increasing statutory regulation there is a global nonprofit sector movement towards greater grassroots regulation what the authors call self regulation through codes of conduct and self accreditation processes This book drills down to the country level to study both sides of this equation examining how state regulation and nonprofit self regulation affect each other and investigating the causal nature of this interaction Exploring these issues from historical cultural political and environmental perspectives and in sixteen jurisdictions Australia China Brazil Ecuador England and Wales Ethiopia Ireland Israel Kenya Malawi Mexico Tanzania Uganda Scotland United States and Vietnam the authors analyse the interplay between state control and nonprofit self regulation to better understand broader emerging trends
