COMPACT EXCAVATOR EC45

Even more efficient !

Like all Volvo machines, the
EC45 develops an impressive
level of performance.

The bucket force and dig-
ging depth are amongst the
best on the market to give
you improved productivity
on all your sites.

Excellent equipment performance

The bucket has a new large range
of movements (new ISOPE). This
characteristic guarantees a good attack
and great resistance at all depths.

Long chassis for more stability

The considerable length of the
track provides exceptional stability
and allows more impact and safety
while working ground pressure.

Valve quick coupling

The exclusive Volvo quick coupling
enables an economy in a bucket to be
handled quickly without losing the
operator's rate. Enabling use for other
machines in hydraulic.

Compact rear impact protection

The new compact dimensions of the
Volvo machine enable them to
work safely in the narrowest sites.
The reinforced shape of the counter-
weight protects the machine with
excellent protection against all impacts.

Loading of the effort arm

The effort arm is equipped with a
hydrostatic valve which loads the arm
and prevents it from shaking. The
result: the operator's effort is totally lost
in the position chosen by the operator
even during long and difficult work.

Load-bearing system

operator has a compact excavator
from an easy to operate.

From construction, independent of
movement - the hydraulic
load-bearing system fixed to the EC45
machine represents the best available
technology.

The boom effort for working straightly a wall

The hydraulic effort of the boom
enables it possible to reduce the
overall dimensions of the excavator
and to work straightly a wall.
