Why Math Must Replace Science Mike Hockney:

Why Math Must Replace Science Mike Hockney, 2014-11-03 The greatest catastrophe in intellectual history was to regard physics as real and mathematics as an unreal abstraction In fact mathematics is noumenal true reality and physics is phenomenal illusory reality Mathematics tells you what things are in themselves and physics tells you how they appear to us Mathematics is the perfect ground of existence defined by the God Equation It s the source of causation determinism and objective reality all of the things now formally denied by physics which claims that observable reality is indeterministically born of unreal potentiality wavefunctions It s time to replace the scientific method with the mathematical method It s time to recognize that true reality is intelligible not sensible noumenal not phenomenal unobservable not observable metaphysical not physical hidden not manifest rationalist not empiricist necessary not contingent Don t follow the crowd Think for yourself

Gödel Versus Wittgenstein Mike Hockney, 2016 Perhaps nothing has been more misinterpreted than G del s incompleteness theorems Stephen Hawking adopting the popular misconception said Thus mathematics is either inconsistent or incomplete The smart money is on incomplete If mathematics is tautology as Wittgenstein said mathematics cannot be inconsistent and or incomplete and so G del s work cannot be about mathematics If mathematics is not tautological mathematics is mired in inconsistency and or incompleteness just as Stephen Hawking said hence is unreliable If mathematics is non ontological it cannot say anything about reality If mathematics is ontological it s the only thing that can say anything true about reality There can t be a world where math is a bit true and a bit false Either the world is wholly mathematical in which case math and not science is how we must study the world or the world isn t mathematical at all in which case it s absurd for science to use math

Ontological Mathematics: How to Create the Universe Mike Hockney, This book explains how the entire universe can be created using just two ingredients nothing at all and the Principle of Sufficient Reason PSR Why would you need anything else Nothing else could do the job Existence believe it or not is just dimensionless mathematical points moving according to the PSR Come and find out how the PSR accomplishes it

Science's War On Reason Mike Hockney, 2016-01-02 People can t reason They don t even know what reason is Reason is almost always harnessed to something that has nothing to do with reason Believers in mainstream religion are feeling types who reason with their emotions or with their mystical intuitions Scientists are sensing types They subordinate their reason to their senses All scientists are empiricists and are opposed to rationalism i e the existence of a rational order of reality completely removed from the human senses which can only be apprehended rationally logically mathematically and via intellectual intuition Scientists try to don the cloak of rationalism even though they are explicitly opposed to mathematical rationalism which addresses a more fundamental noumenal reality than the one amenable to phenomenal science

The War of the Ghosts and Machines Mike Hockney, 2015-09 Are you a ghost or a machine You don t need to be a superstitious believer to support the side of the ghosts Machine people reduce everything to lifeless mindless purposeless atoms of matter the

ultimate little machines For ghost people reality reduces to dimensionless mathematical singularities which are none other than the hyperrational monadic souls posited by Pythagoras and Leibniz Ghost people subscribe to atoms minds with atomic number zero i e minds souls are made of massless dimensionless photons Machine people start with hydrogen atoms with atomic number one All ghost entities are associated with zero and infinity All machine people deny the existence of zero and infinity Mathematically these are the two numbers where the ghosts and the machines collide head on This book is all about demonstrating that there are indeed ghosts in the machines *Psychophysics* Mike Hockney,2015-09 One hundred percent of scientists think that Einstein s special theory of relativity is correct One hundred percent of scientists are wrong Isn t that astounding Why is it so hard for scientists to see the blatant errors in Einstein s logic The central reason for the failure of Einstein s theory as an account of ultimate existence is that like everything else in science it denies the real existence of mind Once mind is admitted to physics Einstein s fallacies become obvious To refute both Einstein only one thing is required to place an eternal non sensory mathematical Singularity at the centre of the spacetime universe This Singularity is a Fourier frequency domain but is functionally equivalent to a Cosmic Mind Because it s an immaterial dimensionless entity outside space and time the Singularity is undetectable by any scientific experiment yet its existence automatically disproves all claims of scientific materialism regarding the fundamental nature of reality The Forbidden History of Science Mike Hockney,2015-07-31 The problem is not to find the answer it s to face the answer Terence McKenna At school you are taught science You are not taught the history of science so you have no idea how science came to be the institution it now is You are never taught the secret history of science whereby scientific idealism based on the mind could have become the orthodoxy rather than scientific materialism based on the body In this book we will show you how easily science could have taken an entirely different route from the one it did take The heroes of this tale are Immanuel Kant in his younger Leibnizian years and the Jesuit Roger Boscovich Their system embraced mind in its own right i e mind considered as something that does not owe its existence to matter Read for yourself the astounding rival history of science You will soon discover why it s so terrified of drawing any attention to the secret history of science the forbidden history The Science of Monads Mike Hockney,2015-07-31 Scientific materialism isn t the only type of science Leibniz the great German genius was a champion of scientific idealism The atoms in his system weren t physical but mental and he named them monads A present day Leibniz might say All things are made from mental atoms which are simple mathematical substances from which all compounds are mathematically derived via the laws of ontological mathematics Monads are expressed through constant motion and that mental motion is what we call thinking Pure thinking takes place in an immaterial mathematical frequency domain outside space and time By virtue of Fourier mathematics frequency functions can be represented in a spacetime domain and this domain is what is known as the physical world of matter It is just a certain mode of mental functionality There is no such thing as scientific matter There is only mind A mind is a monad and monads are all there are Everything is an expression of

monadic mental mathematics The Illumination Project Mike Hockney,2024-04-12 They came seeking Illumination Did they find it Well how would they know What makes you think you re enlightened Maybe you re one of those false awakeners How do you know that your enlightenment isn t illusory What criteria are you using to determine what enlightenment is Why those criteria Have you ever even thought about it And if you haven t how can you possibly be enlightened Enlightenment isn t ignorance It s not about willfully ignoring the facts It s not about turning your back on reason and logic It s not about severe cognitive deficits It s not about annihilating your mind nirvana It s not about unconditional love It s not about your feelings at all It s not about super duper mystical intuition It s not about perfecting your senses It s about none of those Project Illumination is about showing what Illumination is really all about Come inside and expose yourself to the light of reason the only thing that can truly illuminate you Are you ready to receive the light Let s light this thing up **Black Holes Are Souls** Mike Hockney,2015-03-31 Any theory any theory at all that begins with false assumptions will produce false results Therefore the most fundamental task of all is to examine and get right the assumptions that underlie a theory How do science s fundamental assumptions stand up to scrutiny Science falls apart at a particular aspect of existence that can be defined exactly at singularities The whole logic of science collapses when singularities are encountered This is fantastically problematic for science given that black holes are centred on singularities photons are singularities and the whole of the Big Bang Universe came from a Singularity What ontologically are singularities Descartes gave us the answer hundreds of years ago Singularities are minds and from that single fact science is turned on its head Mind does not come from matter matter comes from mind
