Why We Argue about Climate Change Eric Knight, 2013 A new perspective on a diabolical problem Climate change is one of the most polarising issues of our time but it doesn't have to be that way In Why We Argue about Climate Change Eric Knight unpicks the misconceptions that keep us arguing about and stop us seeing the true nature of the problem and its solutions Why can't we learn anything about climate change from snowstorms or scorching temperatures How have sceptics and believers confused politics and science in their war for public opinion Is climate change a moral challenge or a technological one With optimism and clarity Knight cuts through the distortions and distractions and proposes a better way forward Why We Argue about Climate Change is essential reading for anyone who wants to solve the puzzle of a warming planet rather than squabble about the weather It contains expanded and updated chapters from Knight's acclaimed book Reframe as well as much new material Knight is not just logical and lucid but also consistently interesting and challenging The AgeRedbacks Books with BiteRedbacks are short books on big issues by prominent Australian writers and thinkers These timely interventions offer accessible and vital arguments about society and politics Redbacks will equip, provoke and persuade readers to engage with the national debates that truly matter

The Hartwell Approach to Climate Policy Steve Rayner, Mark Caine, 2014-09-19 The Hartwell Approach to Climate Policy presents a powerful critique of mainstream climate change policies and details a set of pragmatic alternatives based on the

Hartwell Group's collective writings from 1988-2010 Drawing on a rich history of heterodox but increasingly accepted views on climate change policy this book brings together in a single volume a series of key related texts that define the Hartwell critique of conventional climate change policies and the Hartwell approach to building more inclusive pragmatic alternatives This book tells of the story of how and why conventional climate policy has failed and drawing from lessons learned how it can be renovated It does so by weaving together three strands of analysis First it highlights why the mainstream approach as embodied by the Kyoto Protocol has failed to produce real world reductions in greenhouse gas emissions and delayed real meaningful progress on climate change Second it explores the underlying political economic and technological factors which form the boundary conditions for climate change policy but which are often ignored by policy makers and advocates Finally it lays out a novel approach to climate change guided centrally by the goal of uplifting human dignity worldwide and the recognition that this can only succeed if pursued pragmatically economically and with democratic legitimacy With contributions from leading scholars in the field this work presents a original critique of climate policy and a constructive primer for how to improve it

The Troubled Rhetoric and Communication of Climate Change Philip

Eubanks, 2015-05-15 Despite an overwhelming scientific consensus climate change remains one of the most controversial issues of our time Focusing on the rhetoric that surrounds the issue of climate change this groundbreaking book analyses why the debate continues to rage and examines how we should argue when winning the argument really matters Going beyond routine condemnations of the wildest statements made by religious fundamentalists or spokespeople for fossil fuel interests the book explains the mutually exacerbating problems that permit many of us greet catastrophic predictions with an equivocal shrug It argues that the argumentative situation around climate change makes a certain kind of skepticism fair minded skepticism not only possible but likely The book also strikes a hopeful note reminding us that people do change their minds in response to effective argumentation that appeals to deeply shared values Offering new insight into an ongoing academic discussion about the nature of argument and how it can be undertaken more effectively and ethically as well as a new perspective on the rhetoric of science and technology this book will be a valuable resource to students and scholars of climate change environmental humanities rhetoric environmental communication sociology and science and technology studies

Rethinking Climate Change Research Pernille Almlund, 2016-04-08 The problems and debates surrounding

climate change possess closely intertwined social and scientific aspects This book highlights the importance of researching climate change through a multi disciplinary approach namely through cultural studies communication studies and clean technology studies These three dimensions taken together have the ability to constitute a positive agenda for climate change science in its broader understanding To cope with the climate change challenge not only do we need new energy efficient technologies other ways of living and new ways to communicate but we especially need new ways to start thinking about climate change across disciplines and backgrounds We need to begin thinking across engineering cultural science and

communication in order to create innovative solutions as well as to generate optimistic and progressive narratives about the future Accentuating these softer scientific disciplines their overlaps and the positive discourses they can create this book provides some more profoundly researched themes pertaining to climate change and by that strengthening the analytical as well as the integrative approaches toward the fundamental questions at stake

Research Handbook on Climate Change and Trade Law Panagiotis Delimatsis, 2016-12-30 The interaction between climate change and trade has grown in prominence in recent years This Research Handbook contains authoritative original contributions from leading experts working at the interface between trade and climate change It maps the state of affairs in such diverse areas as carbon credits and taxes sustainable standard setting and trade in green goods and services or investment from both a regional and global perspective Panagiotis Delimatsis redefines the interrelationship of trade and climate change for future scholarship in this area

Climate Justice in a Non-ideal World Jennifer Clare Heyward, Dominic Roser, 2016 This volume seeks to make normative theorising on climate justice more relevant and applicable to political realities and public policy

Systemic Crises of Global Climate Change Phoebe Godfrey, Denise Torres, 2016-04-14 Sociological literature tends to view the social categories of race class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity This limited focus is clearly inadequate Systemic Crises of Global Climate Change is an edited volume of 49 international interdisciplinary contributions addressing global climate change GCC by intentionally engaging with the issues of race gender and class through an intersectional lens The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional and oftentimes reductionist environmental science frame by examining issues within their turbulent political cultural and personal landscapes Varied media and writing styles invite students and educators to reflexively engage different yet complementary approaches to GCC analysis and interpretation mirroring the disparate voices and viewpoints within the field The second volume Emergent Possibilities for Sustainability will take a similar approach but will examine the possibilities for solutions as in the quest for global sustainability This book is a valuable resource for academics researchers and both undergraduate and post graduate students in the areas of Environmental Studies Climate Change Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC

Tindale, 2022-10-14 This accessible book provides a practical discussion of the main elements of argumentation as illustrated by 30 public arguments from a recent year on a wide variety of social cultural and scientific topics Arguing is an important form of communication in any society and a principal way in which ideas are exposed discussed and modified The real life examples examined in this book reflect the different considerations that go into composing arguments and the range of strategies that can be chosen as vehicles for our positions They demonstrate the roles that emotion can play along with other modes of conveying evidence from the use of images to the use of gestures They show the power of threats comparisons and consequences What emerges is an instructive

discussion that illustrates the way we argue and that shows argument invention and evaluation in action This book is a stimulating read for anyone interested in argument and public discourse and can be used as a supplemental text for courses in argumentation persuasive communication critical thinking composition and informal logic
