Understanding Psychological Assessment William I. Dorfman, Michel Hersen, 2013-11-11 Introductory texts on psychological testing and evaluation historically are not in short supply Typically however such texts have been relatively superficial in their discussion of clinical material and have focused primarily on the theoretical and psychometric properties of individual tests More practical clinically relevant presentations of psychological instruments have been confined to individual volumes with advanced and often very technical information geared to the more sophisticated user Professors in introductory graduate courses are often forced to adopt several advanced texts to cover the material at the same time helping students wade through unnecessary technical information in order to provide a basic working knowledge of each test *Understanding Psychological Assessment* is an attempt to address these concerns It brings together into a single volume a broad sampling of the most respected instruments in the psychologist's armamentarium along with promising new tests of cognitive vocational and personality functioning Additionally it presents the most updated versions of these tests all in a practical clearly written format that covers the development psychometrics administrative considerations and interpretive hypotheses for each instrument Clinical case studies allow the reader to apply the interpretive guidelines to real clinical data thereby reinforcing basic understanding of the instrument and helping to insure that both the student and practitioner can actually begin to use the test *Understanding Psychological Assessment* includes cognitive and personality tests for adults children and adolescents as well as chapters on the theory of psychological measurement and integrated report writing

Assessment with the WAIS-IV Jerome M. Sattler, Joseph J. Ryan, 2009 *Assessment with the WAIS IV* is designed as both a teaching text and a reference source for students and professionals The text provides an in depth analysis of a major instrument useful for the cognitive assessment of older adolescents and adults Preface
