Women In Power In Post Communist Parliaments:

Women in Power in Post-communist Parliaments Marilyn Rueschemeyer, Sharon L. Wolchik, 2009 This book examines the life and work of women who have reached positions of political power after the end of communism in Europe It explores the roles they have adopted the relationships they have cultivated and the agendas they have pursued This volume treats the issues comparatively in six countries the Czech Republic Germany with a focus on the former GDR Slovenia Bulgaria Poland and Russia It also includes interviews with and written statements by the very women in power discussed in the first half of the book giving voice to their common and divergent experiences as political actors within an environment of stormy economies and new foreign engagements particularly with the European Union

Women's Access to Political Power in Post-Communist Europe Richard E. Matland, Kathleen A. Montgomery, 2003-05-01 This book considers women's access to formal positions of powers in the newly formed democracies of post communist Europe While acknowledging the relevance of recent history this book takes an important step away from the communist legacy and explicitly argues for a framework based on causal variables identified in the existing literatures from industrialized democracies on women and politics and legislative recruitment After a brief introduction the second chapter sets forth a general theoretical framework which posits that the level of female legislative representation in a given country is a function of the relative supply of and demand for female candidates After a chapter considering a broad overview of public opinion on women and politics in Eastern Europe thirteen country chapters spanning the spectrum of Eastern European democracies address and test hypotheses about the key variables affecting the supply and demand sides of the equation in individual countries Relevant aspects of the communist cultural and developmental legacy are addressed but authors give particular attention to political factors such as electoral rules and the characteristics of the emerging party systems that vary within the Eastern European countries The new democracies of Eastern Europe provide a novel context in which to test and extend our theories about the consequences of political institutions for the quality of democracy Since institutional arrangements are more malleable than developmental or cultural characteristics those variables also offer the greatest promise to scholars and practitioners wondering what can be done to improve women's access to formal arenas of political power How can we build democracies that are stable lasting and representative A careful analysis of the post communist context can help us to address issues concerning institutional design and development that has relevance well beyond the Eastern European context

Social Movements in Post-Communist Europe and Russia Kerstin Jacobsson, Steven Saxonberg, 2015-12-22 This volume provides a much needed update on the state of civil society in post communist Europe and Russia more than two decades after the fall of the communist regimes The chapters offer new perspectives on social movement strategies in post communist Central Eastern Europe and Russia The chapters illustrate how social movements develop particular repertoires of action and contention which are better suited for their specific local contexts in the post communist setting In Russia and Poland the most popular and effective choices are using domestic and transnational legal opportunities judicial activism and litigation that complement the traditional lobbying and mass mobilization Human rights framing has become important in Hungary and the Czech Republic The chapters analyse various types of rights based activism that operate in otherwise prohibitive social and political environments thereby raising highly contentious issues such as animal rights environment and sustainability human rights women's rights and gay rights activism The contributions richly illustrate the often surprising and multiple ways in which transnational discourses and norm pressure are received translated or resisted in the local contexts Finally the volume provides a novel reconceptualisation and offers new understandings of the relationships between the state and civil society in the post communist context This book is based on a special issue of East European Politics

Gender, Institutions and Political Representation Cristina Chiva, 2017-11-21 This book traces the struggles over the institutions of political representation in Central and Eastern Europe focusing on the factors that have held women back over the post communist period as well as on the growing evidence for change throughout the region Post communist Europe has long raised two puzzles for scholars of women's representation in politics First why have women been under represented in politics in every country in the region since communism's collapse Secondly why are there relatively few cases where women's advocates have been successful in pressing for change This comparative study of

Europe's new democracies argues that these puzzles are best understood as questions about male dominance that is about the mechanisms that sustain or alternatively change long established patterns of male over representation in politics over time The author covers six EU member states Bulgaria the Czech Republic Hungary Poland Romania and Slovakia during the period 1990-2016 The book will be of use to students and scholars in the fields of Comparative Politics Democracy and Democratization European Studies Gender Studies Post Communist Studies and Central and Eastern European Studies

The Oxford Handbook of Political Leadership R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback It was studied intensively not only by political scientists but also by political sociologists and psychologists Sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s Thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance Recently however students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes The list of topics is nigh endless elections conflict management public policy government popularity development governance networks and regional integration In the media age leaders are presented and stage managed spun DDLas the solution to almost every social problem Through the mass media and the Internet citizens and professional observers follow the rise impact and fall of senior political officeholders at closer quarters than ever before This Handbook encapsulates the resurgence by asking where are we today It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines It meets the urgent need to take stock It brings together scholars from around the world encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines methods and regions It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural institutional and interpretive approaches It covers formal office based as well as informal emergent political leadership and in both democratic and undemocratic polities
