Emotions and Leadership in Organizations and Educational Institutes Osman Titrek, Anna Stavicka, Ana Campina, Gozde Sezen-Gultekin, Carlos Francisco De Sousa Reis, 2023-11-28 Emotion management is an important source of social capital and synergy for organizations Managers have a great role in the creation of this synergy A manager who can cope with their emotions indirectly contributes to organizational effectiveness This situation is especially important in human oriented organizations providing services rather than goods such as educational institutions Leadership is a process of social influence which maximizes the efforts of others towards the achievement of a goal Leadership stems from social influence rather than authority or power In terms of system approach the input output process and feedback of educational organizations are always related to human behaviors Therefore organizations must address the nature of human beings in all of their managerial processes Although organizations in which people are at the foreground try to continue their functioning on a rational and formal basis throughout the managerial process they sometimes have to manage emotional and informal phenomena In this case there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature What is expected from this administrator is that they do not ignore human needs and emotions while providing the management of educational institutions For this reason these managers should be leaders rather than executives who only work in a formal framework of organization management Moreover principals and teachers should also be leaders in all educational processes Emotions are the main catalyst of positive organizational culture Leaders can create an effective organizational culture with the main source of positive emotions between employers Positive emotions also motivate employees for organizational purposes If a leader wishes to create and maintain an effective organizational culture it is essential to support positive behavior and emotional climate in their institutes and schools Leaders school managers and teachers therefore need to develop emotion management abilities Educational organizations need to shape their organizational culture climate and psychology to support their leaders in efficiently managing their employees emotions

Up to now this topic has been usually addressed as the main catalyst and a sub dimension of emotional intelligence Moreover current evidence classifies social and empathy skills as other sub dimensions of emotional intelligence For this reason this collection of peer reviewed articles will draw attention to the contemporary term emotional management and contribute to educational fields by means of exploring the relationship between emotions and leadership Teacher Emotions Matter: Nature, Antecedents, and Effects Junjun Chen,Hongbiao Yin,Anne Christiane Frenzel,2021-01-05 Navigating Teaching in an Era of Social Distancing and Global Conflict Hai-Jew, Shalin,2024-08-23 Teaching and learning are core endeavors in human society to advance industries disciplines technologies arts and so much more Learning is a lifelong practice for many that not only advances the learner but whole sub populations and populations In a fast moving and highly dynamic world uninterrupted learning is essential for both recovery and progress In the aftermath of the rolling global disaster of the COVID 19 pandemic the world saw massive slides in human learning progress among school aged and college level youth which must be avoided going forward Navigating Teaching in an Era of Social Distancing and Global Conflict focuses on the state of teaching and learning in this current moment The following chapters evaluate the responses and data from the previous pandemic as well as other crisis situations In addition to these insights the varied professionals on this project explore preemptive preparedness and improved responses at both a local and a global level Covering topics such as barriers to access holistic development and emergency remote teaching this book is an excellent resource for administrators educators policymakers pre service teachers researchers academicians and more
