Sewer of Progress Cindy McCulligh,2023-07-25 A creative and comprehensive exploration of the institutional forces undermining the management of environments critical to public health For almost two decades the citizens of Western Mexico have called for a cleanup of the Santiago River a water source so polluted it emanates an overwhelming acidic stench Toxic clouds of foam lift off the river in a strong wind In *Sewer of Progress* Cindy McCulligh examines why industrial dumping continues in the Santiago despite the corporate embrace of social responsibility and regulatory frameworks intended to mitigate environmental damage The fault she finds lies in a disingenuous discourse of progress and development that privileges capitalist growth over the health and well being of ecosystems Rooted in research on institutional behavior and corporate business practices *Sewer of Progress* exposes a type of regulatory greenwashing that allows authorities to deflect accusations of environmental dumping while regulated dumping continues in an environment of legal certainty For transnational corporations this type of simulation allows companies to take advantage of double standards in environmental regulations while presenting themselves as socially responsible and green global actors Through this inversion the Santiago and other rivers in Mexico have become sewers for urban and industrial waste Institutionalized corruption a concept McCulligh introduces in the book is the main culprit a system that permits and normalizes environmental degradation specifically in the creation and enforcement of a regulatory framework for wastewater discharge that prioritizes private interests over the common good Through a research paradigm based in institutional ethnography and political ecology *Sewer of Progress* provides a critical in depth look at the power relations subverting the role of the state in environmental regulation and the maintenance of public health **Official Records** ,1999 Tools and Algorithms for the Construction and Analysis of Systems Dana Fisman,Grigore Rosu,2022-03-29 This open access book constitutes the proceedings of the 28th International Conference on Tools and Algorithms for the Construction and Analysis of Systems TACAS 2022 which was
