Customers' Demands Adam Nalepka,Anna Ujwary-Gil,2018 We are pleased to introduce our 17th and latest volume from our regular conference Business and Non profit Organizations Facing Increased Competitions and Growing Customers Demands which contains articles highlighting the problems of contemporary for profit and non profit organizations The

added value is the inclusion of multifaceted aspects of an organization's functioning including the sectoral and industrial view. The diversity of the approach to the problems of organization management, business and economy becomes a valuable interdisciplinary view of the economic reality that surrounds us. The monograph is divided into four sections. In the first section, Business and non-profit organizations as the objects of research, articles are exposing the area of strategic management including a museum as a research object, surgical workflow, the performance of cultural organizations and organizational forms of housing resource management. In addition, this section covers a process-oriented view of management including process maturity of the organization and process approach to the analysis of creative capital and mixed project management methodology. In a separate thread, there are articles related to public university mergers based on an example of two academic case studies, the analysis of scientific excellence as a factor influencing academic involvement and the nature of competition for non-profit and for-profit organizations. The second section, entitled Modern tools for business and non-profit organization management, opens with an article on design thinking and the TransistorsHead tool used to analyze teams through organizational terms. Other tools used in eye tracking such as enova365 and Soneta are presented in an article on the optimization of an IT system. In the context of profiling scientific research, not only in the area of academic entrepreneurship but also in the search for research gaps, bibliometrics is undoubtedly a useful tool discussed in a further article. In another article, an attractive tool for competence analysis is the business model and the construction of the competence assessment method which could prove to be helpful in assessing the effectiveness of professional careers. Other articles in this section feature the concept of innovation and knowledge management, medical data management based on a precise legal basis, external financing and its impact on the flexibility of enterprises and a systemic process and resource approach to port modularity. In the next section, Business and non-profit organizations in a market economy, the primary thematic topic is corporate social responsibility, client capital creation and social entrepreneurship. We note the greater emphasis on the social aspects of the organization's functioning and on the social economy. The human thread and the so-called ecosystem in business are becoming more and more desirable and the perspective of business is changing from a profit-oriented one towards a more societal one. In the last section, entitled Business and non-profit organizations: sectoral and industrial aspects, there are articles discussing the issues of organization in macroeconomic terms. This section opens with an article presenting the structural characteristics of industrial clusters and research streams in this area. Subsequently, we have articles that present the municipality from the point of view of the configuration of the network of relations between stakeholders and their involvement in the creation of smart specialization strategies, the determinants of employment change in the Polish services sector, consumer awareness of the credit market, the transparency of public finances, local food and regional products, consumer behaviour in Ukraine as well as trade credit profitability and leverage in Polish companies. Every year this monograph is built on articles that present an up-to-date view of the business and geo-economic reality that

surrounds us whose organizations form the backbone of the economy and its sectors The dynamics of changes are so significant that such studies bring readers closer to current trends and draw the interest of researchers Bio-Materials and Prototyping Applications in Medicine Paulo Jorge Bártolo, Bopaya Bidanda, 2020-10-16 Rapid prototyping is used to design and develop medical devices and instrumentation This book details research in rapid prototyping of bio materials for medical applications It provides a wide variety of examples of medical applications using rapid prototyping including tissue engineering dental applications and bone replacement Coverage also discusses the emergence of computer aided design in the development of prosthetic devices **Ionic Liquids: Properties and Applications** Francesca D'Anna, Jason Harper, 2019-10-17 Sustainability defined as the way to meet the needs of the present generation without compromising the ability of future ones to meet their own is one of the main challenges of modern society Within this context chemistry plays a significant role and solvent nature as well as its environmental impact are pivotal issues frequently addressed Ionic liquids i e organic salts that have melting temperatures lower than 100 C have been frequently hailed as alternatives to conventional organic solvents Their greenness has been mainly ascribed to their low vapor pressure and flammability However in addition to this their high solubilizing ability and low miscibility with conventional organic solvents frequently allow for reducing the amount used as well as for their recycling Ionic liquids especially the ones featured by aromatic cations are frequently described as polymeric supramolecular fluids constructed through the establishment of feeble but cooperative supramolecular interactions like Coulomb and interactions as well as hydrogen bonds In general ionic liquids are also indicated as designer solvents as it is possible to tailor their features to specific applications by simply modifying their cation or anion structure In this way small changes in the ion s structure can give rise to solvents showing very different properties The above premises widely justify the growing interest in the properties and applications of ionic liquids seen in recent literature according to Scopus more than 27 000 papers published in the last five years have ionic liquids as a keyword Thanks to their properties they have been variously used as solvent media solvents for the obtainment of gel phases components in the building of dye sensitized solar cells media for the preparation of thermochromic materials etc This Research Topic aims to present how structural features can determine not only the properties of ionic liquids but also their possible employment In this latter case the interest arises from their ability to affect the outcome of a given reaction in terms of rate yield and nature of the products obtained for general use in the field of materials chemistry This article collection is dedicated to Prof Kenneth R Seddon for his outstanding contribution to the formation and development of the ionic liquids community *Chinese (Taiwan) Yearbook of International Law and Affairs, Volume 41, 2023*, 2024-12-30 Volume 41 of the Chinese Taiwan Yearbook of International Law and Affairs publishes scholarly articles and essays on international and transnational law as well as compiles official documents on the state practice of the Republic of China Taiwan in 2023 The Yearbook publishes on multidisciplinary topics with a focus on international and transnational law issues regarding the
