Evertson,Carol S. Weinstein,2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the

eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years. Management problems continue to be a major cause of teacher burnout and job dissatisfaction. Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field. The Handbook of Classroom Management has four primary goals: 1 to clarify the term classroom management; 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers' managerial tasks; 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry; and 4 to promote a vigorous agenda for future research in this area. To this end 47 chapters have been organized into 10 sections, each chapter written by a recognized expert in that area. Cutting across the sections and chapters are the following themes: First, positive teacher-student relationships are seen as the very core of effective classroom management. Second, classroom management is viewed as a social and moral curriculum. Third, external reward and punishment strategies are not seen as optimal for promoting academic and social-emotional growth and self-regulated behavior. Fourth, to create orderly, productive environments, teachers must take into account student characteristics such as age, developmental level, race, ethnicity, cultural background, socioeconomic status, and ability. Like other research handbooks, the Handbook of Classroom Management provides an indispensable reference volume for scholars, teacher educators, in-service practitioners, and the academic libraries serving these audiences. It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management.

Confronting Today's Issues Chad Prosser, Denise Spirou, Jeffrey L. Buller, 2019-12-10. This book examines some of the most important challenges facing administrators and other professionals in PreK-12 schools today: safety and security; hiring and evaluating members of the faculty and staff; dealing with students' academic and behavioral challenges; assessing student performance; responding to disengaged or overly engaged parents; and handling external pressures from the community. It also explores ideas for how to design the types of schools our students will need in the future and cope with the realities of trying to develop these schools in a difficult educational environment. Preferring practical advice over unsupported hypotheses and adopting clear, instructive language rather than educational jargon, the authors draw upon their own experience as well as some of the best research currently being conducted in the field of educational leadership. The book is suitable for self-study, workshops, education courses, and in-service programs. The target audience is current and prospective PreK-12 administrators, teachers, student teachers, and staff.
