Engine

The D12C is a 12-litre engine that differs from earlier versions of Volvo's 12-litre engines. The engine has been designed to comply with requirements for low fuel consumption and high performance in combination with low exhaust emission.

It has an air cooling system between the turbocharger and the charge air cooler (air intake), overhead camshaft and unit injectors.

The unit injectors are centred vertically in relation to the pistons and are controlled by the camshaft and an electronic control unit.

The control unit is located on the left-hand side of the engine block.

Cylinder head

The cylinder head covers all the cylinders in the engine and has the camshaft on the top.
