criminal justice corrections philosophy of punishment the sociology of punishment and law and justice **Confronting Penal Excess** David Hayes, 2019-11-14 This monograph considers the correlation between the relative success of retributive penal policies in English speaking liberal democracies since the 1970s and the practical evidence of increasingly excessive reliance on the penal State in those jurisdictions It sets out three key arguments First that increasingly excessive conditions in England and Wales over the last three decades represent a failure of retributive theory Second that the penal minimalist cause cannot do without retributive proportionality at least in comparison to the limiting principles espoused by rehabilitation restorative justice and penal abolitionism Third that another retributivism is therefore necessary if we are to confront penal excess The monograph offers a sketch of this new approach late retributivism as both a theory of punishment and of minimalist political action within a democratic society Centrally criminal punishment is approached as both a political act and a policy choice Consequently penal theorists must take account of contemporary political contexts in designing and advocating for their theories Although this inquiry focuses primarily on England and Wales its models of retributivism and of academic contribution to democratic penal policy making are relevant to other jurisdictions too *The End of Prisons.* Mechthild E. Nagel, Anthony J. Nocella, 2013-05-01 This book brings together a collection of social justice scholars and activists who take Foucault's concept of discipline and punishment to explain how prisons are constructed in society from nursing homes to zoos This book expands the concept of prison to include any institution that dominates oppresses and controls Criminologists and others who have been concerned with reforming or dismantling the criminal justice system have mostly avoided to look at larger carceral structures in society In this book for example scholars and activists question the way patriarchy has incapacitated women and imagine the deinstitutionalization of people with disabilities In a time when popular sentiment critiques the dominant role of the elites the one percenters the state's role in policing dissenting voices school children LGBTQ persons people of color and American Indian Nations needs to be investigated A prison as defined in this book is an institution or system that oppresses and does not allow freedom for a particular group Within this definition we include the imprisonment of nonhuman animals and plants which are too often overlooked **Neuroscience for Social Work** Holly Matto, Jessica Strolin-Goltzman, Michelle Ballan, 2013-07-29 This clear and accessible guide written by social workers for social workers describes the most current developments in neuroscience and their practical applications for social work in education child welfare health mental health and criminal justice settings The contributions of social work experts in these key areas of practice make this vast and ever expanding body of neuroscientific knowledge easily understandable with specific relevance to understanding the impact of the environment on neural mechanisms and human life course trajectories The text examines how neuroimaging can be used to examine psychosocial treatment efficacy discusses cross system programmatic and policy implications that respond to the way in which toxic environments and early disrupted attachment affect brain and behavior and addresses the importance of bioethics to inform the integration of
