Why Love Matters Values In Governance:

Why Love Matters Scherto Gill, David Cadman, 2016 As our current systems of decision making are increasingly unable to meet the global challenges of climate change resource depletion poverty healthcare economic instability and global violence the contributors in this book make a radical proposal for an innovative form of governance that is based on core human values such as love compassion care justice and dignity Arising from a concern that the old paradigm of alienation consumerism selfishness and exploitation is damaging for humankind and the family of Earth the book postulates that a new way of being must be in place so that intrinsic values of caring for others should underpin the intent of our decisions at personal regional national international and global levels With illustrative references and examples in fields of politics economy health and peace the content of this book argues forcefully that Love with a capital L matters in governance where values can serve as the basis to transform human consciousness about international institutions community relationships and individual actions Why Love Matters provides an important introductory text to students of global governance management studies political economics international relations and peace studies and equally offers illuminating and instructive ideas to leaders managers and practitioners who are interested in what values based governance means and looks like and how to go about it in practice

Why Love Matters Sue Gerhardt, 2014-10-24 Why Love Matters explains why loving relationships are essential to brain development in the early years and how these early interactions can have lasting consequences for future emotional and physical health This second edition follows on from the success of the first updating the scientific research covering recent findings in genetics and the mind body connection and including a new chapter highlighting our growing understanding of the part also played by pregnancy in shaping a baby's future emotional and physical well being The author focuses in particular on the wide ranging effects of early stress on a baby or toddler's developing nervous system When things go wrong with relationships in early life the dependent child has to adapt what we now know is that his or her brain adapts too The brain's emotion and immune systems are particularly affected by early stress and can become less effective This makes the child more vulnerable to a range of later difficulties such as depression anti social behaviour addictions or anorexia as well as physical illness

Education as Humanisation Scherto Gill, Ulrike Niens, 2017-10-02 Over the past decades there has been a consistent and poignant ambiguity with regard to the role of education in the context of post conflict and divided societies working towards building peace Most recently global developments including the after effects of the Arab Spring the devastating wars in Syria and the refugee crisis in Europe have directed our attention once more to the part that education can play in building peace at many levels In this context it is timely to create a space for a focused inquiry and scholarly debate about peace oriented pedagogies and how they might affect the post conflict reconstruction in divergent settings Thus both the subject and the content of this book are important in the light of the current needs in many societies emerging from conflicted community relations In particular they propose a refreshing and

transformative view of peace based on a humanising conception of education and dialogic pedagogy as a key avenue for peacebuilding Through both conceptual inquiries and empirical case studies the book will appeal to educational thinkers researchers practitioners policy makers NGO workers and the public in re examining some of the key concepts identifying pivotal underlying issues in the field Furthermore by offering a principled persuasive conceptual framework and by problematising implementations and interventions in practice this book can serve to provoke more appraisals evaluations and constructive critiques of humanisation and dialogic pedagogy in peacebuilding education This book was originally published as a special issue of *Compare A Journal of Comparative and International Education* *Practitioner's Guide to Ethics and Mindfulness-Based Interventions* Lynette M. Monteiro, Jane F. Compson, Frank Musten, 2017-10-26 This book focuses on the role of ethics in the application of mindfulness based interventions MBIs and mindfulness based programs MBPs in clinical practice The book offers an overview of the role of ethics in the cultivation of mindfulness and explores the way in which ethics have been embedded in the curriculum of MBIs and MBPs Chapters review current training processes and examines the issues around incorporating ethics into MBIs and MBPs detailed for non secular audiences including training clinicians developing program curriculum and dealing with specific client populations Chapters also examine new second generation MBIs and MBPs the result of the call for more advanced mindfulness based practices The book addresses the increasing popularity of mindfulness in therapeutic interventions but stresses that it remains a new treatment methodology and in order to achieve best practice status mindfulness interventions must offer a clear understanding of their potential and limits Topics featured in this book include Transparency in mindfulness programs Teaching ethics and mindfulness to physicians and healthcare professionals The Mindfulness Based Symptom Management MBSM program and its use in treating mental health issues The efficacy and ethical considerations of teaching mindfulness in businesses The Mindful Self Compassion MSC Program The application of mindfulness in the military context *Practitioner's Guide to Mindfulness and Ethics* is a must have resource for clinical psychologists and affiliated medical and mental health professionals including specialists in complementary and alternative medicine and psychiatry Social workers considering or already using mindfulness in practice will also find it highly useful

Global Health in the Global North Steven P. Black, 2025-06-17 This book investigates how health interventions are imagined into being in high income countries drawing on over seven years of fieldwork in the self described global health capital Atlanta to consider the role of storytelling in the construction of global health futures The volume highlights the ways in which scientific storytelling is critical to our understanding of how global health futures are constructed The book examines three value types epistemic ethical and economic central to contemporary global health and three linguistic and communicative phenomena multimodal poetics emplotment and discursive circulation significant to the constitution of these values through storytelling In spotlighting the Atlanta metropolitan region home to a number of prominent organizations and figures in the development of global health the book showcases deeper insights into the future

oriented and techno optimistic stories global health professionals tell each other funders and the public Black builds on these discussions to suggest ways forward for these stories to be improved to foster greater equity and decolonization and re imagine the future of global health This book will be of interest to students and scholars in linguistic anthropology medical anthropology global health and health humanities **Happiness, Flourishing and the Good Life** Garrett

Thomson, Scherto Gill, Ivor Goodson, 2020-09-24 Well being studies is an exciting and relatively new multi disciplinary field with data being gathered from different domains in order to improve social policies In its reliance on a truncated account of well being based implicitly on neoclassical economic assumptions however the field is deeply flawed Departing from reductive accounts of well being that exclude the normative or evaluative aspect of the concept and so impoverish the attendant conception of human life this book offers a new perspective on what counts normatively as being well In reconceptualising well being holistically it presents a fresh vista on how we can consider the meanings of human life in a manner that also serves as a source of constructive social critique The book thus undertakes to invert the usual approach to the social sciences in which the research is required to be objective in terms of methodology and subjective with regard to evaluative claims Instead the authors are deliberately objective about values in order to be more open to the subjectivities of human life Happiness Flourishing and the Good Life thus seeks to move away from economic considerations domination of all social spaces in order to understand the possibilities of well being beyond instrumentalisation or commodification A radical new approach to the human well being this book will appeal to philosophers social theorists and political scientists and all who are interested in human happiness *Beyond Inhumanity* Scherto Gill, 2025-04-21

Collective efforts to address the legacies of slavery and colonialism tend to orient solely towards dealing with material compensation such as reducing economic disparity and levelling access to public services However communities directly impacted by the dehumanizing legacies have insisted on a broader reckoning one that recognizes all dimensions of the harms including the spiritual injury and the relevant psychosocial trauma inflicted across the generations They remind us that harms of structural injustice extend beyond the material the physical and the psychological also entangling the moral relational and spiritual fabric of human life Understanding harms of inhumanity brings to light the layers of damage and is key to identifying interdisciplinary approaches to collective healing social transformation and the well being of all This book emerges from the ongoing intellectual dialogue as part of the UNESCO Collective Healing Initiative The Initiative focuses on healing the wounds of inhumanity co creating just societies and enhancing the flourishing of current and future generations **A Finer Future** L.

Hunter Lovins, Stewart Wallis, Anders Wijkman, John Fullerton, 2018-10-09 The blueprint for an inspiring regenerative economy that avoids collapse and works for people and the planet Humanity is in a race with catastrophe Is the future one of global warming 65 million migrants fleeing failed states soaring inequality and grid locked politics Or one of empowered entrepreneurs and innovators working towards social change leveling the playing field and building a world that works for

everyone While the specter of collapse looms large A *Finer Future* demonstrates that humanity has a chance just to thread the needle of sustainability and build a regenerative economy through a powerful combination of enlightened entrepreneurialism regenerative economy technology and innovative policy The authors world leaders in business economics and sustainability gather the environmental economics evidence outline the principles of a regenerative economy and detail a policy roadmap to achieving it including Transforming finance and corporations Reimagining energy agriculture ecosystems and the nature of how we work Enhancing human well being Delivering a world that respects ecosystems and human community Charting the course to a regenerative economy is the most important work facing humanity and A *Finer Future* provides the essential blueprint for business leaders entrepreneurs environmentalists politicians policymakers and others working to create a world that works for people and the planet AWARDS SILVER 2020 Eric Zencey Prize SILVER 2018 Nautilus Book Awards Ecology Environment BRONZE 2018 Foreword INDIES Business Economics *Routledge Handbook of Social Futures* Carlos López Galviz, Emily Spiers, 2021-11-22 Featuring chapters from an international range of leading and emerging scholars this Handbook provides a collection of cutting edge interdisciplinary research that sheds new light on contemporary futures studies Engaging with key defining questions of the early twenty first century such as climate change big data AI the future of economics education mental health cities and more the Handbook provides a review and synthesis of futures scholarship highlighting the role that societies can and should play in their making While the various chapters demonstrate how futures emerge and take shape in particular places at particular times the distinctive insight provided by the volume overall is that futures thinking today must be social and contextual By presenting a range of futures work from contexts around the globe the Handbook contextualizes techniques forecasting backcasting scenario planning collaboration and co production to ask how different dimensions of the social are created and circulated in the process Through its thirty chapters the volume explores and interrogates narratives anticipations enactments ecologies collaborations prospectations and so on to highlight which versions of the social are legitimized and which are encouraged and foreclosed This Handbook opens an important conversation about the centrality of the social in futures thinking By bringing arts humanities and social sciences scholars and practitioners into conversation with biologists environmental climate and computer scientists this volume seeks to encourage new pathways across between and within multiple disciplines to interrogate the futures we need and want The social must be our starting point if we are to steer our planet in a direction that supports good lives for the many everywhere **Miracles We Have Seen** Harley Rotbart, 2016-09-13 This is a book of miracles medical events witnessed by leading physicians for which there is no reasonable medical explanation or if there is the explanation itself is extraordinary These dramatic first person essays detail spectacular serendipities impossible cures breathtaking resuscitations extraordinary awakenings and recovery from unimaginable disasters Still other essays give voice to cases in which the physical aspects were less dramatic than the emotional aspects yet miraculous and transformational for everyone

involved Positive impacts left in the wake of even the gravest of tragedies profound triumphs of heart and spirit Preeminent physicians in many specialties including deans and department heads on the faculties of the top university medical schools in the country describe in everyday language and with moving testimony their very personal reactions to these remarkable clinical experiences Among the extraordinary cases poignantly recounted by the physicians witnessing them A priest visiting a hospitalized patient went into cardiac arrest on the elevator which opened up on the cardiac floor right at the foot of the cardiac specialist at just the right moment A tiny premature baby dying from irreversible lung disease despite the most intensive care who recovered almost immediately after being taken from his hospital bed and placed on his mother's chest President John F Kennedy's son Patrick who died shortly after birth and whose disease eventually led to research that saved generations of babies A nine year old boy who was decapitated in a horrific car accident but survived without neurological damage A woman who conceived and delivered a healthy baby despite having had both of her fallopian tubes surgically removed A young man whose only hope for survival was a heart transplant but just at the moment he developed a potentially fatal complication making a transplant impossible his own heart began healing itself A teenage girl near death after contracting full blown rabies who became the first patient ever to recover from that disease after an unexpected visit by Timothy Dolan the man who would go on to become the Archbishop of New York A Manhattan window washer who fell 47 stories and not only became the only person ever to survive a fall from that height but went on to make a full recovery Miracles We Have Seen is a book of inspiration and optimism and a compelling glimpse into the lives of physicians their humanity and determined devotion to their patients and their patients families It reminds us that what we don't know or don't understand isn't necessarily cause for fear and can even be reason for hope
