Womens Global Health And Human Rights:

Women's Global Health and Human Rights Padmini Murthy, Clyde Smith, 2010-10-25 Women's Global Health and Human Rights serves as an overview of the challenges faced by women in different regions of the world. Ideal as a tool for both professionals and students, this book discusses the similarities and differences in health and human rights challenges that are faced by women globally. Best practices and success stories are also included in this timely and important text. Major Topics include X Globalization X Gender Based Terrorism and Violence X Cultural Practices X Health Problems X Progress and Challenges

Women's Global Health Patrick James, Lyn Boyd-Judson, 2013-12-26 For many women around the globe, health has become the central intersection of the personal and the political; women's bodies are the arena for policy debates about population, poverty, reproduction, and morality. *Women's Global Health: Norms and State Policies* is a comprehensive assessment of health for women around the globe that will inform debates underway in a wide range of disciplines. These fields include public health, most obviously, but also sociology, anthropology, and other disciplines. This book will advance the interdisciplinary fields of ethics, women's studies, and international studies. It answers several questions with implications for knowledge in the preceding fields, along with relevance to policy. Some of these complex questions include: How do the laws and policies of a nation-state affect women's health? Is the state invested in these issues because women are seen to be bearers and nurturers of future citizens? Or are there other concerns, such as economic development, human welfare, or religious ideology, that shape this engagement? This book also examines the current and historical responsibilities of the state in addressing women's health issues and how these responsibilities can be measured and improved upon. Finally, the book looks at how to best approach the underlying ethical issues in practical and useful ways for women around the globe.

Oxford Textbook of Global Health of Women, Newborns, Children, and Adolescents Delan Devakumar, Jennifer Hall, Zeshan Qureshi, Joy Lawn, 2019 The aim of this book is to provide a summary of the current concepts and challenges in global maternal and child health in a format that appeals to students of the subject, the general public, and current practitioners in the field. It also provides study exercises that may inform tutors on undergraduate and postgraduate courses.

Women in Developing Countries Karen L. Kinnear, 2011-07-22 This book provides a much needed survey of the discrimination and violence against women in developing countries and identifies the literature and resources available about this topic. Because of improvements in communication technologies, the West has become increasingly aware of horrific examples of ongoing discrimination and violence against individual women in developing countries. As a result, more attention is being paid to the gender bias and hardship that women in developing countries face in their everyday lives, and the importance of these women in economic development and the alleviation of poverty is starting to be recognized. *Women in Developing Countries: A Reference Handbook* addresses topics like the status of women in developing countries, their access to education, health care, and the political process, their legal status, the extent to which they are considered property, female

genital mutilation and other harmful practices and other timely issues This book also provides statistical information data on selected nongovernmental organizations NGOs and other organizations set up to improve the lives and advance the status of women and sources of further information in print and nonprint media *Women's Lives* Claire A. Etaugh, Judith S. Bridges, 2015-07-14 *Women's Lives A Psychological Exploration* 3rd Edition draws on a wealth of the literature to present a rich range of experiences and issues of relevance to girls and women This text offers the unique combination of a chronological approach to gender that is embedded within topical chapters Cutting edge and comprehensive each chapter integrates current material on women differing in age ethnicity social class nationality sexual orientation and ableness The third edition reflects substantial changes in the field while maintaining its empirical focus through engaging writing student activities and critical thinking exercises With over 2 100 new references emphasizing the latest research and theories the authors continue to pique interests in psychology of women *Violence against women's health in international law* Sara De Vido, 2020-06-12 This electronic version has been made available under a Creative Commons BY NC ND open access license Violence against women is characterised by its universality the multiplicity of its forms and the intersectionality of diverse kinds of discrimination against women Great emphasis in legal analysis has been placed on sex based discrimination however in investigations of violence one aspect has been overlooked violence may severely affect women's health and access to reproductive health and State health policies might be a cause of violence against women Exploring the relationship between violence against women and women's rights to health and reproductive health Sara De Vido theorises the new concept of violence against women's health in international law using the Hippocratic paradigm enriching human rights based approaches to women's autonomy and reflecting on the pervasiveness of patterns of discrimination At the core of the book are two dimensions of violence horizontal inter personal and vertical state policies Investigating these dimensions through decisions made by domestic regional and international judicial or quasi judicial bodies De Vido reconceptualises States obligations and eventually asks whether international law itself is the ultimate cause of violence against women's health An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence [Global Health, Human Rights, and the Challenge of Neoliberal Policies](#) Audrey R. Chapman, 2016-04-15 Written by a respected authority on human rights and public health this book delivers an in depth review of the challenges of neoliberal models and policies for realizing the right to health The author expertly explores the integration of social determinants into the right to health along with the methodologies and findings of social medicine and epidemiology The author goes on to challenge the way that health care is currently provided and makes the case that achieving universal health coverage will require fundamental health systems reforms **Global Health and Security** Colleen O'Manique, Pieter Fourie, 2018-03-13 The past decade has witnessed a significant increase in the construction of health as a security issue by national governments and multilateral organizations This book provides the first critical feminist analysis of the flesh and blood impacts of the securitization of health on different

bodies while broadening the scope of what we understand as global health security It looks at how feminist perspectives on health and security can lead to different questions about health and in security problematizing some of the common sense assumptions that underlie much of the discourse in this area It considers the norms ideologies and vested interests that frame specific threats to health and policy responses while exposing how the current governance of the global economy shapes new threats to health Some chapters focus on conflict war and complex emergencies while others move from a high political focus to the domain of subtler and often insidious structural violence illuminating the impacts of hegemonic masculinities and the neoliberal governance of the global economy on health and life chances Highlighting the critical intersections across health gender and security this book is an important contribution to scholarship on health and security global health public health and gender studies
