Chan Sin-wai, Laurence Wong

Wordfast Classic User Manual:

The Future of Translation Technology Chan Sin-wai, 2016-10-26 Technology has revolutionized the field of translation bringing drastic changes to the way translation is studied and done To an average user technology is simply about clicking buttons and storing data What we need to do is to look beyond a system's interface to see what is at work and what should be done to make it work more efficiently This book is both macroscopic and microscopic in approach macroscopic as it adopts a holistic orientation when outlining the development of translation technology in the last forty years organizing concepts in a coherent and logical way with a theoretical framework and predicting what is to come in the years ahead microscopic as it examines in detail the five stages of technology oriented translation procedure and the strengths and weaknesses of the free and paid systems available to users The Future of Translation Technology studies among other issues The Development of Translation Technology Major Concepts in Computer aided Translation Functions in Computer aided Translation Systems A Theoretical Framework for Computer Aided Translation Studies The Future of Translation Technology This book is an essential read for scholars and researchers of translational studies and computational linguistics and a guide to system users and professionals

The Routledge Handbook of Translation and Technology Minako O'Hagan, 2019-08-23 The Routledge Handbook of Translation and Technology provides a comprehensive and accessible overview of the dynamically evolving relationship between translation and technology Divided into five parts with an editor's introduction this volume presents the perspectives of users of translation technologies and of researchers concerned with issues arising from the increasing interdependency between translation and technology The chapters in this Handbook tackle the advent of technologization at both a technical and a philosophical level based on industry practice and academic research Containing over 30 authoritative cutting edge chapters this is an essential reference and resource for those studying and researching translation and technology The volume will also be valuable for translators computational linguists and developers of translation tools

Translation Tools and Technologies Andrew Rothwell, Joss Moorkens, María Fernández-Parra, Joanna Drugan, Frank Austermuehl, 2023-04-18 To trainee translators and established professionals alike the range of tools and technologies now available and the speed with which they change can seem bewildering This state of the art copiously illustrated textbook offers a straightforward and practical guide to translation tools and technologies Demystifying the workings of computer assisted translation CAT and machine translation MT technologies Translation Tools and Technologies offers clear step by step guidance on how to choose suitable tools free or commercial for the task in hand and quickly get up to speed with them using examples from a wide range of languages Translator trainers will also find it invaluable when constructing or updating their courses This unique book covers many topics in addition to text translation These include the history of the technologies project management terminology research and corpora audiovisual translation website software and games localisation and quality assurance Professional workflows are at the heart of the narrative and due consideration

is also given to the legal and ethical questions arising from the reuse of translation data With targeted suggestions for further reading at the end of each chapter to guide users in deepening their knowledge this is the essential textbook for all courses in translation and technology within translation studies and translator training Additional resources are available on the Routledge Translation Studies Portal

How to Translate Nicolae Sfetcu, 2015-04-19 A guide for translators about the translation theory the translation process interpreting subtitling internationalization and localization and computer assisted translation A special section is dedicated to the translator's education and associations The guide includes as annexes several independent adaptations of the corresponding European Commission works freely available via the EU Bookshop as PDF and via SetThings.com as EPUB MOBI Kindle and PDF For a smart sensible translation you should forget not the knowledge acquired at school or university but the corrective standards Some people want a translation with the touch of the source version while another people feel that in a successful version we should not be able to guess the original language We have to realize that both people have right and wrong and that their only fault is to present requirement as an absolute truth Teachers agree at least on this principle If a sentence is ambiguous the translation must also be There is another critical less easy to argue based on an Italian phrase with particularly strong wording Traduttore traditore This critique argues that any translation will betray the author's language spirit style because of the choices on all sides What to sacrifice clarity or brevity if the formula in the text is brief and effective but impossible to translate into so few words with the exact meaning One could understand this criticism that it encourages us to read in the text It seems obvious that it is impossible to follow this advice into practice

"I don't translate, I create!" Vanessa Drexler, 2016-01-05 I don't translate I create This is the slogan of a translation agency called Sternkopf Communications located in Fl. Germany The translators at this translation agency are specialized in the field of marketing and perceive creativeness their daily bread But what does this actually mean I don't translate I create Undoubtedly the translation of a text from one language into another is not an easy and straightforward process On the contrary the translator needs to invest much time and one or the other headache before a target text TT finally sounds natural fluent coherent and logical for the target audience Different possible translation solutions will have to be considered language as well as culture related equivalents often are not easily at hand etc Would it not be pleasant if machine translation MT was there to help with this process Yet despite the enormous importance of creativity in translating computer aided translation CAT tools are being used frequently by professional translators not to replace but to support the translator in their daily business CAT tools enable their users to translate in a more consistent way since they search source texts for words phrases or sentences that have already been translated before and stored in the TM so that the translator does not need to translate this text unit again from scratch Considering that this process brings about what could be called semi mechanical TTs the use of CAT tools seems to stand in stark contrast to the importance of creativity mentioned above Thus the question arises whether CAT tools influence the creative energy of translators and if this is the case whether

translators regard this influence as rather positive or negative In this context it is also important to consider which fields of expertise generally demand a high degree of uniformity consistency in translations and which subject fields generally allow for a high degree of creative freedom Accordingly this paper pursues two related purposes The first is to compare five CAT tools in their degree of usability The second purpose is to identify translators perspectives on uniformity and creativity in translations with the goal to shedding light on the question whether CAT tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis

Routledge Encyclopedia of Translation Technology Chan Sin-wai,2014-11-13 The Routledge Encyclopedia of Translation Technology provides a state of the art survey of the field of computer assisted translation It is the first definitive reference to provide a comprehensive overview of the general regional and topical aspects of this increasingly significant area of study The Encyclopedia is divided into three parts Part One presents general issues in translation technology such as its history and development translator training and various aspects of machine translation including a valuable case study of its teaching at a major university Part Two discusses national and regional developments in translation technology offering contributions covering the crucial territories of China Canada France Hong Kong Japan South Africa Taiwan the Netherlands and Belgium the United Kingdom and the United States Part Three evaluates specific matters in translation technology with entries focused on subjects such as alignment bitext computational lexicography corpus editing online translation subtitling and technology and translation management systems The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline All the articles are self contained extensively cross referenced and include useful and up to date references and information for further reading It will be an invaluable reference work for anyone with a professional or academic interest in the subject

Teaching Translation and Interpreting Łukasz Bogucki,Mikołaj Deckert,2012-12-21 Translation is a phenomenon that affects us all on a daily basis the more so now that dissemination of information is greatly enhanced by modern technology However there are no strict regulations on who can become a translator and what qualifications are required The contributors to this volume strive to find out whether translators are taught self taught or trained what the teaching or training programmes are like and how they can be improved This is a companion volume to *Teaching Translation and Interpreting Challenges and Practices* edited by Łukasz Bogucki Cambridge Scholars Publishing 2010 It contains papers delivered at two international conferences devoted to teaching translation and interpreting organised in d Poland as well as invited contributions The authors are translation and interpreting scholars and teachers from leading Polish and Ukrainian universities

Translatons from D to J , Two Voices in One Chan Sin-wai,Laurence Wong,2014-07-03 *Two Voices in One* Essays in Asian and Translation Studies is a collection of papers by eight scholars of international standing Concentrating on what really makes

Asian and Translation Studies fascinating and worth one's while it opens the reader's eyes to new horizons horizons not found in collections or monographs that look at either discipline in isolation In going through the collection the reader will see how a translation problem can rear a yellow ochre head why a Chinese garden can become a source language text and in what way a commentary can shine with Multiflorate Splendour Emerging from the surreal world the reader must be prepared first to have his/her breath taken away by a translation project on a truly grand scale then to see the difference between the page and the stage and finally to be amazed by the speed at which computer aided translation has been developing With equal amazement the reader will learn that Chinese can sometimes be more effectively taught not through Chinese but through translation and that the Greek philosopher Aristotle and the Chinese philosopher Mencius are linked not only by philosophy but also by translation
