The Work Safety Crash Course Aiden Sisko, 2015-12-14 In order to maximize performance and minimize hazards in the workplace we need to install a system in place that addresses work safety protocols and procedures Following this also adds to the sense of security and safety of the workers without having to worry about their safety and well being will be more likely to perform their best in the workplace They don't have concerns in the back of their brains about their safety and well being It also shows to the workforce that you or management actually cares enough to take care of their safety needs Some firms mistakenly still treat work safety as just optional processes But in recent years with increase in work related accidents and huge financial settlements against these corporations these companies are starting to realize the value of putting priority and putting extra effort and care into this aspect of the operation It is also good business practice to avoid lawsuits and lost productivity due to accidents illnesses and related mishaps Although it might just seem an added inconvenience and added cost to make the workplace safer In the long run it will pay off in fiscal and non monetary benefits AI Crash Course
