The United Nations As A Knowledge System Global Institutions:

The United Nations as a Knowledge System Nanette Svenson, 2015-10-16 This book seeks to explore how the UN has generated warehoused disseminated structured packaged expanded transferred and leveraged its vast resources of accumulated information and experience throughout the decades and particularly since the start of the 21st century with the introduction of more connective information and communications technology It examines the overarching objectives that have guided such activity and divides UN knowledge management into three distinct but often overlapping and intertwining categories knowledge for social and organizational learning knowledge for norm setting and knowledge for creation of products and services Svenson brings together these multiple aspects of UN knowledge management to present a holistic view of how the organization utilizes its global intelligence to educate advocate and serve member countries development Instead of looking at the UN as an international bureaucracy or as a peacekeeping policymaking humanitarian or development entity this work studies the UN as a generator and purveyor of information learning and experience in all of these areas This book will be key reading for all students and scholars of international organizations **ECKM 2017 18th European Conference on Knowledge Management** Academic Conferences and Publishing Limited, 2017

International Organizations and Military Affairs Hylke Dijkstra, 2016-02-05 From the UN Department of Peacekeeping Operations to the NATO International Staff and the European External Action Service international bureaucrats make decisions that affect life and death In carrying out their functions these officials not only facilitate the work of the member states but also pursue their own distinct agendas This book analyzes how states seek to control secretariats when it comes to military operations by international organizations It introduces an innovative theoretical framework that identifies different types of control mechanisms The book presents six empirical chapters on the UN NATO and EU secretariats It provides new data from a unique dataset and in depth interviews It shows that member states employ a wide range of control mechanisms to reduce the potential loss of influence They frequently forfeit the gains of delegation to avoid becoming dependent on the work of secretariats Yet while states invest heavily in control this book also argues that they cannot benefit from the services of secretariats and keep full control over outcomes in international organizations In their delegation and control decisions states face trade offs and have to weigh different cost categories the costs of policy administrative capacity and agency loss This book will be of interest to scholars postgraduates and officials in international organizations and national governments dealing with questions of international political economy security studies and military affairs **Displacement, Development, and Climate Change** Nina Hall, 2016-03-22 This book focuses on one critical challenge climate change Climate change is predicted to lead to an increased intensity and frequency of natural disasters An increase in extreme weather events global temperatures and higher sea levels may lead to displacement and migration and will affect many dimensions of the economy and society Although scholars are examining the complexity and

fragmentation of the climate change regime they have not examined how our existing international development migration and humanitarian organizations are dealing with climate change Focusing on three institutions the United Nations High Commissioner for Refugees the International Organization for Migration and the United Nations Development Programme the book asks how have these inter governmental organizations responded to climate change And are they moving beyond their original mandates given none were established with a mandate for climate change It traces their responses to climate change in their rhetoric policy structure operations and overall mandate change Hall argues that international bureaucrats can play an important role in mandate expansion often deciding whether and how to expand into a new issue area and then lobbying states to endorse this expansion They make changes in rhetoric policy structure and operations on the ground and therefore forge frame and internalize new issue linkages This book helps us to understand how institutions established in the 20th century are adapting to a 21st century world It will be of great interest to scholars and students of International Relations Development Studies Environmental Politics International Organizations and Global Governance as well as international officials

Why

International Organizations Hate Politics Marieke Louis, Lucile Maertens, 2021-04-05 Building on the concept of depoliticization this book provides a first systematic analysis of International Organizations IO apolitical claims It shows that depoliticization sustains IO everyday activities while allowing them to remain engaged in politics even when they pretend not to Delving into the inner dynamics of global governance this book develops an analytical framework on why IOs hate politics by bringing together practices and logics of depoliticization in a wide variety of historical geographic and organizational contexts With multiple case studies in the fields of labor rights and economic regulation environmental protection development and humanitarian aid peacekeeping among others this book shows that depoliticization is enacted in a series of overlapping sometimes mundane practices resulting from the complex interaction between professional habits organizational cultures and individual tactics By approaching the consequences of these practices in terms of logics the book addresses the instrumental dimension of depoliticization without assuming that IO actors necessarily intend to depoliticize their action or global problems For IO scholars and students this book sheds new light on IO politics by clarifying one often taken for granted dimension of their everyday activities precisely that of depoliticization It will also be of interest to other researchers working in the fields of political science international relations international political sociology international political economy international public administration history law sociology anthropology and geography as well as IO practitioners

Kofi Annan and Global Leadership at the United Nations Abiodun Williams, 2024-05-23 Kofi Annan was the most

significant and influential Secretary General of the United Nations Kofi Annan and Global Leadership at the United Nations is a study of how Annan conceived his role as Secretary General and exercised global leadership at a turbulent period in world affairs Williams discusses the challenges he faced during his tenure from 1997 to 2006 and how he dealt with them The volume sheds light on the importance of leadership for the performance of a global institution and examines such issues as Conflict Prevention Peacekeeping Peacebuilding the Millennium Development Goals HIV AIDS the Responsibility to Protect Human Rights Climate Change and Migration It provides insight into how Annan led the UN during several international crises including the terrorist attacks of 9 11 conflicts in Kosovo and East Timor and the war in Iraq It illustrates how he built partnerships with non state actors including nongovernmental organizations the private sector universities think tanks and Nobel laureates in order to advance the UN s mission without relying exclusively on state power and inter state cooperation Kofi Annan and Global Leadership at the United Nations charts Annan s ambitious efforts to reform and adapt the UN to the needs of the twenty first century It is a pathbreaking and authoritative volume and a union of scrupulous scholarship and insider knowledge of the UN

Bridging Scales and Knowledge Systems Walter World Resources Institute, Walter Millennium Ecosystem Assessment, 2013-04-09 Bridging the gap between local knowledge and western science is essential to understanding the world s ecosystems and the ways in which humans interact with and shape those ecosystems This book brings together a group of world class scientists in an unprecedented effort to build a formal framework for linking local and indigenous knowledge with the global scientific enterprise Contributors explore the challenges costs and benefits of bridging scales and knowledge systems in assessment processes and in resource management Case studies look at a variety of efforts to bridge scales providing important lessons concerning what has worked what has not and the costs and benefits associated with those efforts Drawing on the groundbreaking work of the Millennium Eco system Assessment Bridging Scales and Knowledge Systems will be indispensable for future efforts to conduct ecosystem assessments around the world
