the city is completely redefined here in the form of a design approach inspired by projects shaped by linear routes such as cycle or walking paths. Such concept is applied to the urgent topic of territorial marginality which specifically neglects rural and mountainous areas and recently is coped by European and National policies. The analysis of these policies demonstrates the necessity of alternative strategies equipped to deal with both the internal and external causes that determine the critical conditions in these fragile environments. By implementing the concept of linear planning in these contexts, this book proposes to enlarge the perspective of traditional policies contrasting the regional inequalities that usually determine the design of projects just within the boundaries of the marginal areas. Cycle and walking paths are experimental cases of linear planning as they have not been influenced or formed by political boundaries and therefore are able to equally involve both the central and marginal zones. This book presents a review of current issues such as regional inequalities with attention to their related policies as well as an analysis of the concept of linear planning as seen through the study of one of the most famous cases of a walking path, the Way of St James in Spain.

The Clarke Bushrangers Judy Lawson, The Clarke Bushrangers have long been painted as ruthless criminals, murderous thieves whose infamy shaped the Australian frontier during the 1860s. But what if the truth is far more complex than the legends suggest? Through meticulous research and a critical lens, *The Clarke Bushrangers: A Clash of Cultures: The Untold Story* re-examines the lives and alleged crimes of these infamous outlaws. Uncover the surprising inconsistencies between their purported exploits and the official records, warrants issued and mysteriously revoked, trials dismissed and charges discharged. Delving deep into the era's press coverage and the motives of those in power, this compelling narrative challenges the established historical narrative. What emerges is a story not just of bushrangers but of systemic prejudice, political intrigue and the cultural clashes that shaped colonial Australia. Perfect for history enthusiasts and lovers of true crime, this book reveals how history is written and rewritten by those in control. Could the Clarke brothers have been scapegoats for a society grappling with its own conflicts and contradictions? Decide for yourself in this gripping reexamination of an Australian legend.

Introduction to Geopolitics Colin Flint, 2016-10-06 This new updated edition of *Introduction to Geopolitics* presents the overarching themes of geopolitical structures and agents in an engaging and accessible manner which requires no previous knowledge of theory or current affairs. Using new pertinent case studies and guided exercises, the title explains the contemporary global power of the United States and the challenges it is facing: the persistence of nationalist conflicts, migration, cyberwar, terrorism and environmental geopolitics. Case studies of the rise of the so-called Islamic State, the South China Sea disputes, the Syrian civil war, the Korean conflict and Israel/Palestine emphasize the multi-faceted nature of conflict. The book raises questions by incorporating international and long-term historical perspectives and introduces readers to different theoretical viewpoints, including feminist contributions. The new edition features expanded sections on network geopolitics and non-state actors, a new section on geopolitics of transnational business, cyberwar, an interpretation of ISIS within historical geopolitical trends as well as expanded discussion of the

relevance of Boserup and neo Malthusians to environmental geopolitics Introduction to Geopolitics will provide its readers with a set of critical analytical tools for understanding the actions of states as well as non state actors acting in competition over resources and power Both students and general readers will find this book an essential stepping stone to a deeper and critical understanding of contemporary conflicts

The Materiality of Stone Christopher Tilley, 2020-06-03 With Wayne Bennett From the silky wax qualities of the surfaces of some quartz menhirs to the wood grain textures of others to the golden honeycombed limestones of Malta to the icy frozen waves of the Cambrian sandstone of south east Sweden this book investigates the sensuous material qualities of stone Tactile sensations sonorous qualities colour and visual impressions are all shown to play a vital part in our understanding of the power and significance of prehistoric monuments in relation to their landscapes In *The Materiality of Stone* Christopher Tilley presents a radically new way of analyzing the significance of both cultural and natural stone in prehistoric European landscapes Tilley's groundbreaking approach is to interpret human experience in a multidimensional and sensuous human way rather than through an abstract analytical gaze The studies range widely from the menhirs of prehistoric Brittany to Maltese Neolithic temples to Bronze Age rock carvings and cairns in southern Sweden Tilley leaves no stone unturned as he also considers how the internal spaces and landscape settings are interpreted in relation to artifacts substances and related places that were deeply meaningful to the people who inhabited them and remain no less evocative today In its innovative approach to understanding human experience through the tangible rocks and stone of our past *The Materiality of Stone* is both a major theoretical and substantive contribution to the field of material culture studies and the study of European prehistory
