Within The Four Seas The Dialogue Of East And West

A. L. Macfie

Within The Four Seas The Dialogue Of East And West:

Within the Four Seas Joseph Needham,2013-11-05 First published in 1969 Contains some of Joseph Needham s most significant essays lectures and broadcasts on the history of Chinese science technology and culture Also included are some more personal thoughts stimulated by his own travels and experiences in China including a number of poems The book discusses the valuable social and intellectual influences which have flowed to Europe from South as well as East Asia and suggests that the events of the twentieth century were a natural development of Chinese history not a deviation from it

George Yeo: Selected Musings George Yong-boon Yeo,2024-05-03 Over sessions which lasted two to three hours each time every week for half a year George Yeo met and mused over a wide range of topics with writer Woon Tai Ho and research assistant Keith Yap Speaking from notes he began with himself and his hope for Singapore and then spanned over a wide range of subjects from the importance of human diversity and Singapore s reflection within itself of the world to history politics economics philosophy taijigong and religion He gives his views on India China ASEAN Europe the US and other parts of the world and how Singapore s history and destiny are connected to all of them The style is conversational and anecdotal George Yeo Musings is exactly that musings Some themes recur throughout the book which reflect his view of life But there is no grand theory He does not expect all of his reflections to be of interest to everyone but he hopes that everyone will find something of interest This special edition offers a selection of Musings from the three series Science and National Consciousness in Bengal J. Lourdasamy,2004 This book gives a flavour of the Indian response to modern science by analysing the lives and careers of four scientifically influential personalities in Bengal His analysis of the careers of two scientists J C Bose and P C Ray and two institution builders Mahendralal Sircar and Asutosh Mookerjee brings to light the issues related to science at a time of colonialism and nationalism Scientists often had to depend on British institutions for legitimation and funding while also supporting the nationalist cause for greater autonomy One of the central claims of this book is that the protagonists aimed to contribute to a modern world science one based on a strong sense of universalism They did not aim to construct any alternative sciences though they did express and apply their work by drawing on their cultural heritage This makes Science and National Consciousness a work of particular relevance today when a homogenous instrumentalist and totally Western conception of science is being globally accepted Imperial China, 900-1800 F. W. Mote,2003-11-15 In this history of China for the 900 year span of the late imperial period Mote highlights the personal characteristics of the rulers and dynasties and probes the cultural theme of Chinese adaptations to recurrent alien rule Generational events personalities and the spirit of the age combine to yield a comprehensive history of the civilization **All Under Heaven** John H. Berthrong,1994-03-22 This book is a study of comparative philosophy and theology The themes are the critical issues arising from the modern interpretation of Confucian doctrine as they confront the Christian beliefs of the nineteenth and twentieth centuries **Drugs and Popular Culture** Paul Manning,2013-01-11 The use of illegal drugs is so common that a number of

commentators now refer to the normalisation of drug consumption It is surprising then that to date very little academic work has explored drug use as part of contemporary popular culture This collection of readings will apply an innovatory multi disciplinary approach to this theme combining some of the most recent research on the normalisation thesis with fresh work on the relationship between drug use and popular culture In drawing upon criminological sociological and cultural studies approaches this book will make an important contribution to the newly emerging field positioned at the intersection of these disciplines The particular focus of the book is upon drug consumption as popular culture It aims to provide an accessible collection of chapters and readings that will explore drug use in popular culture in a way that is relevant to undergraduates and postgraduates studying a variety of courses including criminology sociology media studies health care and social work

The Dialectics of Ecology John Bellamy Foster, 2024-04 Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other

Eastern Influences on Western Philosophy A. L. Macfie, 2019-08-05 This Reader explores the extent of Oriental influence on European thought primarily in the period of the Enlightenment and the nineteenth century period of doubt and scepticism that followed it It is the first Reader to bring together in one place a series of specific historical and textual studies of Oriental influence upon European thinkers

Learning From China? Bernhard Glaeser, 2013-09-05 First published in 1987 this volume was written to shed some light upon the nature and environmental consequences and wider relevance of development strategies in the Peoples Republic of China It covers industrialisation food production energy use and landscape and settlement planning The Chinese autocentred strategy is assessed from both the developmental and the environmental viewpoints Decision making processes and the opportunities to implement environmental policy in other parts of the developing world are analysed and the volume concludes with the view that benefits to other countries are likely to arise out of increased co operation and exchange with China although the Chinese model is by no means a panacea All students and researchers interested in either environmental or developmental issues will find this book to be a substantial and enlightening contribution to literature

Functions and Uses of Disciplinary Histories Loren Graham, Wolf Lepenies, P. Weingart, 2012-12-06 Edward Gibbon s allegation at the beginning of his *Essay on the Study of Literature* 1764 that the history of empires is that of the miseries of humankind whereas the history of the sciences is that of their splendour and

happiness has for a long time been accepted by professional scientists and by historians of science alike. For its practitioner the history of a discipline displayed above all the always difficult but finally rewarding approach to a truth which was incorporated in the discipline in its actual form. Looking back it was only too easy to distinguish those who erred and heretics in the field from the few forerunners of true science. On the one hand the traditional history of science was told as a story of hero and hero worship; on the other hand it was paradoxically enough the constant attempt to remind the scientist whom he should better forget. It is not surprising at all therefore that the traditional history of science was a field of only minor interest for the practitioner of a distinct scientific discipline or specialty and at the same time a hardly challenging task for the professional historian. Nietzsche had already described the historian of science as someone who arrives late after harvest time; it is somebody who is only a tolerated guest at the thanksgiving dinner of the scientific community.
