Wits Tuition Fees For 2015:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt Modern State Development, Capacity, and Institutions Derica Lambrechts, 2017-07-31 This book makes an important original conceptual and theoretical contribution to our understanding of modern state development the role of the state and the South African transition to democracy Its focus on related concepts such as state capacity political trust and tolerance adds to insights on the dynamics of political and democratic transitions Furthermore the selected focus areas as well as the comparative approach add new insights into the peculiarities of the South African transition state development state capacity and state institutions Its focus on societal dynamics and state society relations is a significant contribution #RhodesMustFall Nyamnjoh, Francis B., 2016-04-18 This book on rights entitlements and citizenship in post apartheid South Africa shows how the playing field has not been as levelled as presumed by some and how racism and its benefits persist Through everyday interactions and experiences of university students and professors it explores the question of race in a context still plagued by remnants of apartheid inequality and perceptions of inferiority and inadequacy among the majority black population In education black voices and concerns go largely unheard as circles of privilege are continually regenerated and added onto a layered and deep history of cultivation of black pain These issues are examined against the backdrop of organised student protests sweeping through the country s universities with a renewed clamour for transformation around a rallying cry of Black Lives Matter The nuanced complexity of this insightful analysis of the Rhodes Must Fall movement elicits compelling questions about the attractions and dangers of exclusionary articulations of belonging What could a grand imperialist like the stripling Uitlander or foreigner

of yesteryear Sir Cecil John Rhodes possibly have in common with the present day nimble footed makwerekwere from Africa north of the Limpopo The answer Nyamnjoh suggests is to be found in how human mobility relentlessly tests the boundaries of citizenship *#RhodesMustFall* B. Nyamnjoh,2016-04-18 This book on rights entitlements and citizenship in post apartheid South Africa shows how the playing field has not been as levelled as presumed by some and how racism and its benefits persist Through everyday interactions and experiences of university students and professors it explores the question of race in a context still plagued by remnants of apartheid inequality and perceptions of inferiority and inadequacy among the majority black population In education black voices and concerns go largely unheard as circles of privilege are continually regenerated and added onto a layered and deep history of cultivation of black pain These issues are examined against the backdrop of organised student protests sweeping through the countrys universities with a renewed clamour for transformation around a rallying cry of Black Lives Matter The nuanced complexity of this insightful analysis of the Rhodes Must Fall movement elicits compelling questions about the attractions and dangers of exclusionary articulations of belonging What could a grand imperialist like the stripling Uitlander or foreigner of yesteryear Sir Cecil John Rhodes possibly have in common with the present day nimble footed makwerekwere from Africa north of the Limpopo The answer Nyamnjoh suggests is to be found in how human mobility relentlessly tests the boundaries of citizenship Breaking a Rainbow, Building a Nation Rekgotsofetse Chikane,2018-10-01 Breaking a Rainbow Building a Nation is a first hand account of the university protests that gripped South Africa between 2015 and 2017 widely better known as the FeesMustFall Chikane outlines the nature of student politics in the country before during and after the emergence of MustFall politics exploring the political dynamics that informed and drove the student protests and the effect that these MustFall movements have had on the nature of youth politics in the country Chikane looks at how the current nature of youth politics is different from previous youth upheavals that have defined South Africa specifically due to the fact that the protests were being led by so called coconuts who are part of the black elite Breaking a Rainbow Building a Nation poses the provocative question can coconuts be trusted with the revolution The South African State Transformed? Louis A. Picard,Thomas M. Mogale,Caitlin C. Corrigan,2024-09-10 This book examines the nature of the 1994 political transition in South Africa and its impact on post apartheid South Africa Specifically it examines the failures of liberalism within the context of the transitional process that led to the institution if not the practice of a non racial state in 1994 The term liberal is an eclectic term defining a several of views political and economic We use the term here within context but essentially define it as a commitment to open views the willingness to consider change and to value basic human rights The nature of institutional change in South Africa as it moved towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist democratic country or collapse into yet another African failed state As South Africa moves toward its fourth decade of majority rule the view towards the future is much less promising than it was in 1994 **Power Shift? Political Leadership**

and Social Media David Taras, Richard Davis, 2019-12-09 Power Shift Political Leadership and Social Media examines how political leaders have adapted to the challenges of social media including Facebook Instagram Twitter and memes among other means of persuasion Established political leaders now use social media to grab headlines respond to opponents fundraise contact voters directly and organize their election campaigns Leaders of protest movements have used social media to organize and galvanize grassroots support and to popularize new narratives narratives that challenge and sometimes overturn conventional thinking Yet each social media platform provides different affordances and different attributes and each is used differently by political leaders In this book leading international experts provide an unprecedented look at the role of social media in leadership today Through a series of case studies dealing with topics ranging from Emmanuel Macron and Donald Trump s use of Twitter to Justin Trudeau s use of selfies and Instagram to how feminist leaders mobilize against stereotypes and injustices the authors argue that many leaders have found additional avenues to communicate with the public and use power This raises the question of whether this is causing a power shift in the relationship between leaders and followers Together the chapters in this book suggest new rules of engagement that leaders ignore at their peril The lack of systematic theoretically informed and empirically supported analyses makes Power Shift Political Leadership and Social Media an indispensable read for students and scholars wishing to gain new understanding on what social media means for leadership

Youth In South Africa Ariane De Lannoy, Malose Langa, 2021-05-05 South Africa is characterised by a youthful population and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice Youth in South Africa Agency in visibility and national development takes stock of the nation s development as it affects young people Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood These include formal and informal engagements with politics as well as protest unemployment entrepreneurship education religion experiences with sexuality and violence and a multitude of other life experiences Contributors paint a picture of the initiative agency and resilience of the youth as well as the challenges before them Authors also identify the state of waithood faced by those unable to make the transition out of youth into full adulthood as a result of their socio economic circumstances and political context By engaging these experiences and insights and primarily informed by the inputs of young people the authors highlight the limitations of existing youth policies and frameworks The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment and by the messages the youth communicate about the limitations of current approaches

University on the Border Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along

with the historicities that define the university both locally and globally The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university
