"Cashville" - Dilution of Original Country Music Identity Through Increasing Commercialization Stephanie Schäfer, 2012-04 Where I come from it's cornbread and chicken This line from Alan Jackson's country hit defines the genre as the music of the American South All its ambiguity set aside the South stands proudly for its hospitality politeness sense of place and community Family and religion are traditionally more important down there than in the rest of the country As Southern culture becomes more and more americanized and the music of the small town Southern man another Jackson song is adapted for a mainstream audience the original rustic identity that defines the true American genre loses its charm Modern country music has become slick and professionalized and sounds more and more like common pop music to make it more profitable This study focuses on the authentic country music identity and how it is threatened by increasing commercialization It defines said identity and the working class culture from which it springs It traces the history of country music and its different genres from the 19th and early 20th century cowboy music over Western Swing and Honky Tonk of the 1930s and 1940s the progressive movements of the 1960s and 1970s up to today's mainstream Country Pop and shows how its target audience has changed over time and how the opposition tries to preserve traditional sounds Authentic Texas Country is set in contrast to the commercial Nashville recording industry and both are compared in their respective developments over the years In the face of terrorism which poses a threat to the American National identity country music with its representative American values has become increasingly popular and enforces a strong collective identity on a national level However in doing so it also dilutes the original identity that was once restricted to life in a small town community rather than the country as a whole What sets country music as a genre apart is its narrative structure Every song has a story to tell Be it about The Cold Hard Facts of Life a prayer finally answered or the first kiss on a Saturday night

Manifestations of Collective Identity in Country Music - Cultural, Regional, National Stephanie Schäfer, 2011-12-01

Inhaltsangabe Introduction All American music reflects the landscape from which it springs and as that landscape changes chewed up by the developments and industry and environmental disasters as the air we breathe in and out of our lungs is filled

with new particles as the water we drink gets its fluoride levels regulated and mineral content tweaked it makes perfect sense that American music becomes slicker more machinated less like reality We are all subject to our environs fashioned and chiseled and sanded into shapes We have highways for arteries and clouds for brains and sticks for bones The sounds we make are Americana As one of the first musical expressions of the United States country music represents the values and ideals on which the nation was founded Country music can be seen as the epitome of the American Dream It has its origins in the 19th century when cowboys were working in the fields and riding through the lonely prairie an image that has been romanticized by numerous Hollywood movies This thesis focuses on country music as a genre as well as the identity which it represents and by which audience and performers are linked Country music can be regarded as the music of Southern working class Americans Since before the Civil War the South has always been looked down upon as being primitive simple minded and extremely religious Having its roots in the South country music has had to face substantial criticism in terms of unsophistication and over sentimentalization Due to a shift in national economic power the United States have become increasingly Southernized both culturally and musically Southern culture and identity have become desirable This phenomenon allowed country music to shed its dubious reputation and gain popularity across the country This paper will shine a light on the American South as a cultural region that has more to offer than what meets the eye Southern working class culture and its core values are going to be described and put in context with country music as a form of cultural expression Central themes in American country music are family love heartbreak work friends religion and patriotism Characteristic for the country music genre are its narrative structures which by telling a story enhance its ability to form a collective identity as well as a connection between the narrator the performer and the audience However country musicians are not solely messengers of the
