Dutch-Asiatic Trade 1620 - 1740 Kristof Glamann,2012-12-06 The present monograph has grown out of a good many years of study of the history of the European trade to the East Indies The starting point actually was Danish Having treated the history of the Danish Asiatic Company during the period 1732 1772 I went abroad in order to familiarize myself with the background to the reorganization of Danish trade about 1732 It was especially the possible connexion with the dissolved Ostend Company and the counter measures diplomatic as well as economic of the Dutch English and French companies that interested me Through these investigations I got acquainted with the various Northwest European company records and soon realized that the Dutch archives offered a rich material especially as regards quantities and prices A study on the Dutch Company s trade in Japanese copper a subject which had previously occupied Scandinavian historians in connexion with the question of the status of Swedish copper on the European market in the 17th century amplified my knowledge of the archives in the Hague to such a degree that I dared to tackle the greater object of giving a description of the Company s trade as a whole during its heyday On various points it proved to be necessary to make comparative investigations especially in the English East India Company s archives in London

Empire and the Peasant Proprietor Preet S. Aulakh,2025-09-18 As the British Empire consolidated its geographical possession of distant lands by the 19th century the agrarian nature of its colonies necessitated careful considerations about land tenure relationships After intense debates around property rights and political economy several land laws were enacted across the Empire between 1868 and 1875 which recognised the proprietary rights of peasant cultivators Empire and the Peasant Proprietor examines this transformative shift in the imperial

approaches to land tenure Through a comparative analysis of historical land tenure arrangements in three diverse colonial sites Punjab Ireland and Prince Edward Island the book identifies two crucial mechanisms which facilitated the institutionalisation of peasant proprietorship One there was a fortuitous ideological alignment between important governing agents in the three colonies Two the debate about the impact of land reform in the colonies on the sanctity of English principles was redirected allowing for inter colony analogies and precedents to support the proprietary rights of peasant cultivators Empire and the Peasant Proprietor demonstrates the importance of these reciprocal influences within the imperial system and provides insight into contemporary challenges of secure land rights for a large proportion of the global population that continues to be dependent on agriculture for sustenance This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations
