Religious Experience A Study in Human Nature is a book by Harvard University psychologist and philosopher William James. It comprises his edited Gifford Lectures on natural theology which were delivered at the University of Edinburgh Scotland between 1901 and 1902. The lectures concerned the psychological study of individual private religious experiences and mysticism and used a range of examples to identify commonalities in religious experiences across traditions. Soon after its publication, *Varieties* entered the Western canon of psychology and philosophy and has remained in print for over a century. James later developed his philosophy of pragmatism. There are many overlapping ideas in *Varieties* and his 1907 book *Pragmatism*; he book has 14 chapters covering twenty lectures and a postscript. Lecture I Religion and Neurology. In this first lecture James outlines the scope of his investigation. Neither a theologian nor a historian of religion, James states that he is a psychologist and therefore his lectures will concern the psychology of religious feelings rather than the institutions of religion. This further limits his enquiry to religious phenomena that have been articulated and recorded by individuals, limiting his study to either modern writers or sources from history which have become classic texts. James then distinguishes between questions concerning something's origin and its value, insisting that his purpose is to understand the origin of religious experiences and not to pass judgement on their value. This means that if James finds some material or natural cause of religious experience in his study, this should not lead anyone to conclude that this undermines their religious or spiritual value. Lecture II Circumscription of the Topic. In his circumscription of the topic, James outlines how he will define religion for the sake of the lectures. Religious institutions are found wanting in this regard since they are not primary but rather depend on the private religious feeling of individuals, especially those of the founders of such institutions. James thus defines the essence of religion as the feelings, acts, and experiences of individual men in their solitude so far as they apprehend themselves to stand in relation to whatever they may consider divine.<sup>3</sup> He then distinguishes religion from moral or philosophical systems such as Stoicism which also teach a particular way of living, arguing that religion is distinguished by the presence of a sentiment which gladly assents to it. Religion is thus that which combines a moral system with a particular positive sentiment. Lecture III The Reality of the Unseen. James begins his third lecture by noting that all states of mind involve some kind of object but that religious experiences involve an object which cannot be sensibly perceived. This ability to be aware of insensible objects in the mind, such as being aware of a presence in the room, is an ability particular to human beings. These experiences are sometimes connected with religion but not always, and James insists that they are not at all unusual. For those who have had such experiences, they are irrefutable and no rational argument will dissuade someone of their reality, even if the subject cannot explain or answer for the experience themselves. However, James criticises the rationalistic and scientific approaches which would question these experiences as being rarely convincing in the sphere of religion. Rational arguments about religion are compelling for someone only if they already believe the conclusion. This is just a fact of human psychology for James, not a value judgement: humans are more persuaded irrationally and emotionally than

they are by reasons James concludes his lecture by noting the different kinds of responses such experiences can elicit joy and sorrow the variation of which will occupy his following lectures

The Varieties of Religious Experience by William James (Annotated) William James, 2021-08-13. Standing at the crossroads of psychology and religion, this catalyzing work applied the scientific method to a field abounding in abstract theory. William James believed that individual religious experiences rather than the precepts of organized religions were the backbone of the world's religious life. His discussions of conversion, repentance, mysticism, and saintliness, and his observations on actual personal religious experiences all support this thesis. In his introduction, Martin E. Marty discusses how James's pluralistic view of religion led to his remarkable tolerance of extreme forms of religious behaviour, his challenging, highly original theories, and his welcome lack of pretension in all of his observations on the individual and the divine.
