The Vocation Lectures Max Weber, 2004 Originally published separately Weber's Science as a Vocation and Politics as a Vocation stand as the classic formulations of his positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber's central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity The Vocation Lectures Max Weber, David S. Owen, Tracy B.

Owen, 2004-03-12 Originally published separately Weber's Science as a Vocation and Politics as a Vocation stand as the classic formulations of his

positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber's central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity **The Interest in Disinterestedness** Pierre Bourdieu, 2024-07-04 A key feature of those who work for the state in the legal system and in public services is that they claim to be putting their own personal interests aside and working in a disinterested fashion for the public good But is disinterested behaviour possible Can law be treated as a set of universal rules that are independent of particular interests or is this mere ideology Is the state bureaucracy a universal class as Hegel thought or a structure that serves the interests of the dominant class as Marx claimed In his lecture courses at the Collège de France in 1987-88 and 1988-89 Pierre Bourdieu addressed these questions by examining the formation of the legal and bureaucratic fields characteristic of the modern state uncovering the historical and social conditions that enable a social group to form and find its own interests in the very fact of serving interests that go beyond it For a disinterested universe to emerge it needs both the invention of a public service or a spirit of service to the public cause and the creation of a social universe in which individuals can pursue a career devoted to public service and be rewarded for it In other words it requires a process of specialization whereby autonomous specific fields become established in the social cosmos within which a special kind of game that follows the rules of disinterest can be played out By reconstructing the conditions under which an

interest in disinterestedness emerged Bourdieu sheds new light on the formation of the modern state and legal system and provides a fresh perspective on the many professions in modern societies that are oriented towards the service of the common good

Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons

of the stories we Americans live by as well as the civic virtues we commonly need to create a free just and multi racial America These critical virtues McCarthy argues are the specific goal of a liberal and democratic education

Living under Post-Democracy Caleb R. Miller,2020-02-28 When money equates to power and the system is rigged in favor of wealthy elites why do we still pretend we are living in a democracy In Living under Post Democracy Caleb R Miller challenges us to admit what we already know that most of us are effectively powerless over the political decisions that govern our lives Instead we should embrace a post democratic view of politics one which recognizes the way in which our political institutions fail both systematically and historically to live up to our democratic ideals while also acknowledging our tragic yet enduring attachment to them both Offering a new framework for conceptualizing contemporary citizenship Miller explores how a post democratic perspective can help us begin to reorient ourselves in our paradoxical fractured political landscape This model of citizenship opens the possibility for a distinctly post democratic approach to both political participation and political philosophy treating them not as ways of affecting politics but as opportunities for therapeutically engaging with the ongoing challenges and inevitable frustrations of post democratic life This book is an excellent addition to courses on democratic theory as well as introductory courses to political theory

Giusti,Elisa Piras,2020-12-30 This book explores the challenges that disinformation fake news and post truth politics pose to democracy from a multidisciplinary perspective The authors analyse and interpret how the use of technology and social media as well as the emergence of new political narratives has been progressively changing the information landscape undermining some of the pillars of democracy The volume sheds light on some topical questions connected to fake news thereby contributing to a fuller understanding of its impact on democracy In the Introduction the editors offer some orientating definitions of post truth politics building a theoretical framework where various different aspects of fake news can be understood The book is then divided into three parts Part I helps to contextualise the phenomena investigated offering definitions and discussing key concepts as well as aspects linked to the manipulation of information systems especially considering its reverberation on democracy Part II considers the phenomena of disinformation fake news and post truth politics in the context of Russia which emerges as a laboratory where the phases of creation and diffusion of fake news can

Coletta,2016-05-25 In Courting Science Damon Coletta offers a novel explanation for the decline of American leadership in world affairs Whether the American Century ends sooner rather than later may depend on America s capacity for self reflection and ultimately self restraint when it comes to science technology and engineering Democracy s affinity for advanced technology has to be balanced against scientific research and progress as a global enterprise In an era of rising challengers to America s lead in the international order and an increasingly globalized civil society a Scientific State has a better chance of extending its dominance In order to draw closer to this ideal though the United States will have to reconsider its grand strategy It must have a strategy that scrutinizes how tightly it constrains how narrowly it directs and how far it trusts American scientists If given the opportunity scientists have the potential to lead a second American Century through domestic science and technology policy international diplomacy and transnational networks for global governance
