It's Christmastime in Rudolph New York which means it's time for the December Santa Claus parade. This year shop owner Merry Wilkinson has decided to decorate her float as Santa's elves workshop and invites her landlady Mabel D Angelo to help supervise the excited children playing the elves. But when Mrs D Angelo doesn't show up, Merry begins to worry. Worry quickly turns into frustration when Mrs D Angelo reveals she was delayed by new neighbors moving in. As the center for all things gossip, Mrs D Angelo is determined to introduce the new arrivals to the neighborhood. As the days pass, Mrs D Angelo notices strange things about the newcomers, but Merry busier than an elf in Santa's workshop has little time for matters that really don't concern her. But things turn from jolly to downright concerning when Mrs D Angelo disappears and Merry is forced to admit that something might be terribly wrong. With family and friends counting on her during this stressful holiday season, it is up to Merry to make sure this Christmas doesn't end up wrapped in blood red.

Event Data Recorder (EDR) Interpretation Christopher Armstrong, 2018-11-02 Collision Reconstruction Methodologies Volume 7B The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include Night Vision Study and Photogrammetry, Vehicle Event Data Recorders, Motorcycle, Heavy Vehicle, Bicycle, and Pedestrian Accident Reconstruction. The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction, appealing to crash analysts, consultants, and safety engineers alike.
