Understanding Heritage And Memory Understanding:

Understanding Heritage and Memory Tim Benton, 2010-03-15 Written by an interdisciplinary team of scholars this authoritative text explores the emotive issues surrounding the commemoration of war and atrocity and the profound challenges for conservators posed by virtual intangible and multicultural heritage New international case studies demonstrate that while interest in the memorialization of the great national upheavals of the last century has never been more acute many of the problems of conserving the past in diverse and disparate societies remain to be resolved Aimed primarily at students in heritage studies and professionals in heritage industries this is book one of three in the Understanding Global Heritage series

Understanding Heritage Marie-Theres Albert, Roland Bernecker, Britta Rudolff, 2013-04-30 The publication is the first in a new series on existing and innovative paradigms in Heritage Studies The series aims at systematising and developing the academic discourse on heritage which has yielded a wealth and breadth of contributions over the past few years The publication offers its own emphasis by developing heritage studies with a perspective towards and as a contribution to human development It thus offers a vision for the construction and establishment of a new discipline The academic mainsprings and research interests of this repositioning of heritage studies as an academic discipline are discussed by internationally renowned thinkers and heritage practitioners The publication thus establishes first important points for discussion Central to this publication are questions concerning the sustainable protection and use of heritage focussing on the world cultural heritage and intangible cultural heritage but equally questions on the relation of heritage and memory and how these could mutually enrich our understanding of heritage

Materializing Memory in Art and Popular Culture Laszlo Muntean, Liedeke Plate, Anneke Smelik, 2016-12-08 Memory matters It matters because memory brings the past into the present and opens it up to the future But it also matters literally because memory is mediated materially Materiality is the stuff of memory Meaningful objects that we love or hate function not only as aide mmoire but are integral to memory Drawing on previous scholarship on the interrelation of memory and materiality this book applies recent theories of new materialism to explore the material dimension of memory in art and popular culture The book's underlying premise is twofold on the one hand memory is performed mediated and stored through the material world that surrounds us on the other hand inanimate objects and things also have agency on their own which affects practices of memory as well as forgetting Chapters 1 4 and 5 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license

Heritage, Memory, and Punishment Shu-Mei Huang, Hyun-Kyung Lee, 2019-09-23 Based on a transnational study of decommissioned postcolonial prisons in Taiwan Taipei and Chiayi South Korea Seoul and China Lushun this book offers a critical reading of prisons as a particular colonial product the current restoration of which as national heritage is closely related to the evolving conceptualization of punishment Focusing on the colonial prisons built by the Japanese Empire in the

first half of the twentieth century it illuminates how punishment has been considered a subject of modernization while the contemporary use of prisons as heritage tends to reduce the process of colonial modernity to oppression and atrocity thus constituting a heritage of shame and death which postcolonial societies blame upon the former colonizers A study of how the remembering of punishment and imprisonment reflects the attempts of postcolonial cities to re articulate an understanding of the present by correcting the past Heritage Memory and Punishment examines how prisons were designed built partially demolished preserved and redeveloped across political regimes demonstrating the ways in which the selective use of prisons as heritage reframed through nationalism leaves marks on urban contexts that remain long after the prisons themselves are decommissioned As such it will appeal to scholars of sociology geography the built environment and heritage with interests in memory studies and dark tourism

Connecting Continents Krish Seetah, 2018-06-07 In recent decades the vast and culturally diverse Indian Ocean region has increasingly attracted the attention of anthropologists historians political scientists sociologists and other researchers Largely missing from this growing body of scholarship however are significant contributions by archaeologists and consciously interdisciplinary approaches to studying the region s past and present Connecting Continents addresses two important issues how best to promote collaborative research on the Indian Ocean world and how to shape the research agenda for a region that has only recently begun to attract serious interest from historical archaeologists The archaeologists historians and other scholars who have contributed to this volume tackle important topics such as the nature and dynamics of migration colonization and cultural syncretism that are central to understanding the human experience in the Indian Ocean basin This groundbreaking work also deepens our understanding of topics of increasing scholarly and popular interest such as the ways in which people construct and understand their heritage and can make use of exciting new technologies like DNA and environmental analysis Because it adopts such an explicitly comparative approach to the Indian Ocean Connecting Continents provides a compelling model for multidisciplinary approaches to studying other parts of the globe Contributors Richard B Allen Edward A Alpers Atholl Anderson Nicole Boivin Diego Calaon Aaron Camens Sa a aval Geoffrey Clark Alison

Understanding Nationalism Birgir Hermannsson, 2005 Abstract en This dissertation is an attempt to understand nationalism in a general sense and Icelandic nationalism in particular For this purpose the concepts of ideology political culture discourse and political language are pushed to the forefront as viable analytical tools to take on the difficult phenomena of nationalism It is argued that this perspective is useful in conceptualizing and studying nationalism Moreover it serves both as a benchmark to evaluate the theoretical field as well as guiding the empirical study There is no consensus on either the correct definition of nationalism or the proper theoretical approach to study it This is a result of the highly contested nature of nationalism and the politically infused character of all attempts to define it Both the subject the scholar and the object nationalism are part of changing historical circumstances which make all attempts to objectify nationalism fruitless as well as making our understanding conditional The problematic of the influential modernist school namely state formation democratic rule and economic transformation is accepted as crucial for our understanding of nationalism Its understanding of culture and ideology is however shown to be too instrumental and elitists Cultural production and reception must be given greater prominence The role of external models and the problem of imitation are clearly important for the intellectual mobilization of nationalism The desired model for imitation is not accepted unchanged but must in some way be adapted to the prevailing traditions or conventions of the adapting country **The Edge of Europe** Roxana-Talida
