## What is sinusitis?

Sinusitis is inflammation of the sinuses, which are air-filled cavities in the skull. The sinuses are part of the respiratory system and help to filter and humidify the air we breathe. Sinusitis can be caused by a variety of factors, including viral or bacterial infections, allergies, and structural changes in the sinuses.

## Sinus pain

Sinus pain is a common symptom of sinusitis. It is caused by inflammation and swelling of the sinus lining, which can lead to increased pressure and pain in the face and head.

## Frontal sinusitis

Frontal sinusitis is inflammation of the frontal sinuses, which are located in the forehead area. It is characterized by pain and tenderness in the forehead, especially when bending over.
