Unbelievable Michael Newton Keas, 2019-01-08 *Unbelievable* explodes seven of the most popular and pernicious myths about science and religion Michael Newton Keas a historian of science lays out the facts to show how far the conventional wisdom departs from reality He also shows how these myths have proliferated over the past four centuries and exert so much influence today infiltrating science textbooks and popular culture The seven myths Keas shows amount to little more than religion bashing especially Christianity bashing *Unbelievable* reveals Why the Dark Ages never happened Why we didn't need Christopher Columbus to prove the earth was round Why Copernicus would be shocked to learn that he supposedly demoted humans from the center of the universe What everyone gets wrong about Galileo's clash with the Church and why it matters today Why the vastness of the universe does not deal a blow to religious belief in human significance How the popular account of Giordano Bruno as a martyr for science ignores the fact that he was executed for theological reasons not scientific ones How a new myth is being positioned to replace religion a futuristic myth that sounds scientific but isn't In debunking these myths Keas shows that the real history is much more interesting than the common narrative of religion at war with science This accessible and entertaining book offers an invaluable resource to students scholars teachers homeschoolers and religious believers tired of being portrayed as anti intellectual and anti science **Understanding Our Universe** Stacy Palen, Laura Kay, Brad Smith, George Ray Blumenthal, 2015 Students learn astronomy by doing astronomy **Palen** **Understanding Our Universe Ebook Folder** Palen, 2012-04-01 Understanding Our Universe + Learning Astronomy by

Our Universe a Journey Into Mystery Jeff Jones,2019-01-07 Like all books on the subject Our Universe is full of images of exploding stars and colliding galaxies There are powers and distances beyond human comprehension Darkness surrounds us as we discover most of this place we live in is not available to our eyes and senses It s all very nice but you want more than just another science on parade book There is a much more profound story hidden in the beautiful images spread over the scientific world Everything known to us comes from the Universe If this is correct can the Universe answer questions about meaning and purpose The answer is yes In the past 25 years we have learned more about the Universe than in all recorded history This explosion of knowledge is due to three disruptive forces the personal computer the Internet and the great space

and land based telescopes It is now possible to tell the story of the Universe in 21st century language and images that any interested layman can follow Using these tools the secrets of this extraordinary place are being laid bare The Universe is ready to answer our questions We are prepared to listen I pose three questions for the Universe to answer Who am I What is our home What is the purpose of my life It s a tall order for any book Our Universe uses the vehicle of science astronomy cosmology and the different ways humans know reality to allow the reader to answer these personal questions These threads are woven into a tapestry revealing the Universe in all its glory We don t know everything but we know enough The way forward is clear The journey is from where we are now back in time to the beginning and perhaps a moment before to what I call the Mystery Then we will turn around and watch this Unknowable come into being as our Universe The evolution of the Universe will be before our eyes There lie the answers The Mystery is not knowable or describable in any fashion yet the trajectory of our story sends us squarely into its midst It s where science human language and concepts fail Despite this it is our heritage We must deal with Mystery or we will forever be unfulfilled One of the discoveries will be to realize how all knowledge and the material world are directly related Their origins will be apparent The Big Bang will be found to be a process and not an event It is still becoming not only in the world around us but within as well There are no smoke and mirrors It is a non fiction story you can see for yourself The facts and conclusion are easily checked and the reader will not have to cross their fingers or set their minds aside to appreciate the story Come along for the Journey into Mystery This is the story I always wanted to write It is the story hopefully you are looking to discover The Universe Giles
