Deals and Development Lant Pritchett, Kunal Sen, Eric Werker, 2017-11-10 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations When are developing countries able to initiate periods of rapid growth and why have so few of these countries been able to sustain growth over decades Deals and Development The

Political Dynamics of Growth Episodes seeks to answer these questions and many more through a novel conceptual framework built from a political economy of business government relations Economic growth for most developing countries is not a linear process Growth instead proceeds in booms and busts yet most frameworks for thinking about economic growth are built on the faulty assumption that a country's economic performance is largely stable Deals and Development explains how growth episodes emerge and when growth once ignited is maintained for a sustained period It applies its new framework to examine the growth of countries across a range of institutional and political contexts in Africa and Asia using the examples of Bangladesh Cambodia India Malaysia Thailand Ghana Liberia Malawi Rwanda and Uganda Through these country analyses it demonstrates the explanatory power of its framework and the importance of feedback cycles in which economic trends interact with political behaviour to either sustain or terminate a growth episode Offering a lens through which to analyse complex scenarios and unwieldy amounts of information this book provides actionable levers of intervention to bring about reform and improve a country's chance at achieving transformative economic growth

Impact of Agribusiness on Poverty Reduction in Rwanda. A Statistical Analysis Ishimwe Audace, 2018-09-17 Bachelor Thesis from the year 2018 in the subject Mathematics Statistics grade 1 University of Rwanda University of Rwanda course Research project language English abstract The major aim of this study was to analyze the impact of Agribusiness on poverty reduction The researcher used Huye and Ngoma Sector of HUYE District in southern province as case study The intensification and commercialization of the Rwandan agricultural sector will be essential to reduce poverty and drive economic grow of Rwanda Government of Rwanda policy makers have identified smallholder led agriculture as a key sector for growth and poverty reduction in the country Responding to this aim the government has

steadily increased the budgetary allocation to agriculture from 4.2 percent of the budget in 2008 to nearly 10 percent in 2011. In this study we look at some of the social economic factors benefited by household farmers through the Agribusiness like Income generated from agribusiness, monthly food consumption and householder expenditure and increasing values of asset such as social and economic asset of householder. This research was a survey involving the collection of primary data from a sample of household heads in Huye and Ngoma Sector. Data collected was quantified to enable easy interpretation and analysis. The comparative approach of mean was mainly used to analyze data. Views from respondents were compared to make conclusions. The findings of the study demonstrate that Agribusiness household owns in Huye and Ngoma Sector have benefited from Agribusiness. Household confirmed that householder income, food consumption and values of assets had increased due to agribusiness. The study concludes that once the Government of Rwanda the policy is made properly and fully implemented the Agribusiness will highly enhance food self sufficiency, income and values assets of householder farmers and agribusiness owns will be increase and improving also the livelihood of rural areas through other benefits such as infrastructure development.

Assessing the economywide impacts of COVID-19 on Rwanda's economy, agri-food system, and poverty: A social accounting matrix (SAM) multiplier approach Aragie, Emerta, Diao, Xinshen, Robinson, Sherman, Rosenbach, Gracie, Spielman, David J., Thurlow, James, 2021-05-17. Rwanda's policy response to COVID 19 has been widely praised for its rapid systematic and comprehensive approach to containing the pandemic. Although the economic consequences are unavoidable the country expects to return its economy to its high growth trajectory as the pandemic subsides. We use economic modeling tools designed to estimate the short term economywide impacts of the unanticipated rapid onset economic shocks of COVID 19 on Rwanda. Results show that during the six week lockdown that began in March Rwanda's GDP fell 39.1 percent (RWF 435 billion / USD 484 million) when compared to a no COVID situation in the same period. Results further show that Rwanda's GDP in 2020 will be between 12 and 16 percent lower than a predicted no COVID GDP depending on the pace of the recovery. The losses in annual GDP are between RWF 1.0 and 1.5 trillion / USD 1.1 - 1.6 billion. While GDP for the industrial and services sectors were estimated to have fallen during the lockdown period by 57 and 48 percent respectively, exemptions of COVID 19 restrictions for the agricultural sector limited the decline in agricultural GDP to 7 percent compared to a noCOVID situation. During the lockdown period the national poverty rate is estimated to have increased by 10.9 percentage points as 1.3 million people mostly in rural areas fell into temporary poverty. Poverty rates are expected to stabilize by the end of 2020 increasing only by between 0.4 and 1.1 percentage points. While these figures may be encouraging they mask the impacts on poor households of the sharp poverty spike during the lockdown and the inherent complexity of poverty dynamics post lockdown. Looking forward the speed and success of Rwanda's recovery will depend critically on the expansion of Rwanda's social protection programs, boosting enterprises of all sizes, support to the agri food system and restoration of international trade.
