Uninformed Consent Uninformed Consent:

Uninformed Consent Hal Huggins, Thomas E. Levy, 1999-01-01 Dr Huggins and Dr Levy assert that a large number of disorders are though often incurable easily preventable He proposes that multiple sclerosis lupus leukemia chronic fatigue syndrome Parkinson s disease many mental disorders including Alzheimer s and even major diseases like breast cancer are caused in part by the toxins we place in our bodies Where do these toxins come from and how do they get into our bodies You may be surprised to find that you have actually paid to have them put there These dangerous materials mercury cadmium beryllium nickel and others are used in everyday dentistry to make up the fillings root canals and bridgework in our mouths and are supposed to be safe But are they Uninformed Consent presents cases of toxic poisoning of depressed immune systems and inexplicable illnesses to toxins entering the bloodstream from the heavy metals in dental materials The authors also discuss the hidden truths that the dental industry in America doesn t want to talk about and the real reasons the dangers of these materials have been suppressed and ignored Dr s Huggins and Levy implore the reader Don t leave your health in your dentist s hands and assume that all will be fine Become informed and take an active role in your health Know what will be implanted in your mouth You must decide at the outset what is more important to you the life of a filling or your life Uninformed Consent will give you the facts so that you may take responsibility for your dental and complete health and wellness **Uninformed Consent** Raymond T. McEachern, 2003* **Uninformed Consent** David Heath Duff Wilson,

Misinformed Consent Lise Cloutier-Steele, 2003 The personal accounts in this collection were written by women who have undergone hysterectomies and they offer a sobering perspective on the surgery The potential risks and irreversible consequences of the surgery are presented to dispel popular beliefs that hysterectomies pose no medical or emotional risks The stories and resources encourage individual women and the medical community at large to consider alternative and more effective treatment options This replaces 0773762868 *A History and Theory of Informed Consent* Ruth R. Faden, Tom L. Beauchamp, 1986-02-27 Clearly argued and written in nontechnical language this book provides a definitive account of informed consent It begins by presenting the analytic framework for reasoning about informed consent found in moral philosophy and law The authors then review and interpret the history of informed consent in clinical medicine research and the courts They argue that respect for autonomy has had a central role in the justification and function of informed consent requirements Then they present a theory of the nature of informed consent that is based on an appreciation of its historical roots An important contribution to a topic of current legal and ethical debate this study is accessible to everyone with a serious interest in biomedical ethics including physicians philosophers policy makers religious ethicists lawyers and psychologists This timely analysis makes a significant contribution to the debate about the rights of patients and subjects

Rethinking Informed Consent in the Big Data Age Adam J. Andreotta, 2024-12-23 In the big data age providing informed consent online has never been more challenging Countless companies collect and share our personal data through

devices apps and websites fuelling a growing data economy and the emergence of surveillance capitalism Few of us have the time to read the associated privacy policies and terms and conditions and thus are often unaware of how our personal data are being used This is a problem as in the last few years large tech companies have abused our personal data As privacy self management through the mechanism of providing online consent has become increasingly difficult some have argued that surveillance capitalism and the data economy more broadly need to be overthrown This book presents a different perspective It departs from the concept of revolutionary change to focus on pragmatic incremental solutions tailored to everyday contexts It scrutinises how consent is currently sought and provided online and offers suggestions about how online consent practices can be improved upon These include the possibility of subjecting consent gathering practices to ethics committees for review the creation of visual based consent agreements and privacy policies to help with transparency and engagement the development of software to protect privacy and the idea of automated consent functionalities that allow users to bypass the task of reading vast amounts of online consent agreements The author suggests that these small scale changes to online consent obtaining procedures could if successfully implemented provide us with a way of self managing our privacy in a way that avoids a revolutionary dismantling of the data economy In the process readers are encouraged to rethink the very purpose of providing informed consent online Rethinking Informed Consent in the Big Data Age will appeal to researchers in normative ethics applied ethics philosophy of law and the philosophy of AI It will also be of interest to business scholars communication researchers students and those in industry
