Watson-Vandiver, Sheikia Talley-Matthews, 2023-05-15 Unbleaching the Curriculum Enhancing Diversity Equity Inclusion and Beyond in Schools and Society is an innovative work that applies a new perspective to curriculum design in U S public schools Introducing the framework of unbleaching the book explores curricular omissions and falsifications for the purpose of advancing diversity equity and inclusion DEI in school processes and practices Its content is groundbreaking as it introduces readers to often omitted contributions such as The Teachings of PtahHotep the oldest book in the world and The Ahmes Papyrus the oldest

mathematical document in the world among others The Nation's Report Card government report indicates that U.S. schools are experiencing modest performance NAEP 2022 Thus unbleaching framework has the potential to improve student performance through curriculum development that is informed by multicultural practices The eight key tenets and processes of unbleaching provide the context for how the curriculum might address notable omissions and suppressed historical contributions and promote greater DEI in U.S. public schools Great Books Written by Africans across the Academic Disciplines Emmanuel D. Babatunde, Abdul Karim Bangura, 2022-07-04

This volume is the first text to provide a comprehensive account of the great books across the academic disciplines written by Africans born in the continent and those who became naturalized citizens of African countries These great books are those that have had a powerful important or affecting influence on the author of a chapter in this book as an individual and on society The books included here are mostly of the storytelling type and thus not representative of most of the academic disciplines This volume allows each contributor to write a chapter on a discipline showcasing five great books written by African authors Each selection is appraised and suggestions made by other experts in a discipline while every chapter entails an introduction to the topic a conceptual discussion of the discipline a book by book review of the five books and a conclusion and recommendations for research using the selected books *Wicked Problems* Austin Choi-Fitzpatrick, Douglas Irvin-Erickson, Ernesto Verdeja, 2022 The ethics of changemaking and peacebuilding may appear straightforward advance dignity promote well being minimize suffering Sounds simple right Actually acting ethically when it really matters is rarely straightforward If someone engaged in change oriented work sets out to do good how should we prioritize and evaluate whose good counts And how ought we act once we have decided whose good counts Practitioners frequently confront dilemmas where dire situations may demand some form of response but each of the options may have undesirable consequences of one form or another Dilemmas are not merely ordinary problems they are wicked problems that is to say they are defined by circumstances that only allow for suboptimal outcomes and are based on profound and sometimes troubling trade offs *Wicked Problems* argues that the field of peacebuilding and conflict transformation needs a stronger and more practical sense of its ethical obligations For example it argues against posing false binaries between domestic and international issues and against viewing violence and conflict as equivalents It holds strategic nonviolence up to critical scrutiny and shows that do no harm approaches may in fact do harm The contributors include scholars scholar practitioners in the field and activists on the streets and the chapters cover the role of violence in conflict conflict and violence prevention and resolution humanitarianism community organizing and racial justice social movements human rights advocacy transitional justice political reconciliation and peace education and pedagogy among other topics Drawing on the lived experiences and expertise of activists educators and researchers *Wicked Problems* equips readers to ask and answer difficult questions about social change work
