The Vegetarian Imperative:

The Vegetarian Imperative Anand M. Saxena, 2011-08-31 We have learned not to take food seriously we eat as much as we want of what we want when we want it and we seldom think about the health and environmental consequences of our choices But the fact is that every choice we make has an impact on our health and on the environment In *The Vegetarian Imperative* Anand M Saxena a scientist and lifelong vegetarian explains why we need to make better choices for better health to eliminate world hunger and ultimately to save the planet Our insatiable appetite for animal based foods contributes directly to high rates of chronic diseases resulting in both illness and death It also leads to a devastating overuse of natural resources that dangerously depletes the food available for human consumption The burgeoning population and increasing preference for meat in all parts of the world are stretching planetary resources beyond their limits and the huge livestock industry is degrading the agricultural land and polluting air and water Continuing at this pace will bring us to the crisis point in just a few decades a reality that threatens not only our current lifestyle but our very survival This book shows us a way out of this dangerous and vicious cycle recommending a much needed shift to a diet of properly chosen plant based foods Each of these arguments alone personal health worldwide hunger and environmental degradation provides reason enough to stop consuming so much animal based food taken together they make an unassailable case for vegetarianism Supported by up to date and accurate scientific data *The Vegetarian Imperative* will make you rethink what you eat and help you save the planet

Animals and the Limits of Postmodernism Gary Steiner, 2013-04-16 In *Animals and the Limits of Postmodernism* Gary Steiner illuminates postmodernism's inability to produce viable ethical and political principles Ethics requires notions of self agency and value that are not available to postmodernists Thus much of what is published under the rubric of postmodernist theory lacks a proper basis for a systematic engagement with ethics Steiner demonstrates this through a provocative critique of postmodernist approaches to the moral status of animals set against the background of a broader indictment of postmodernism's failure to establish clear principles for action He revisits the ideas of Derrida Foucault Nietzsche and Heidegger together with recent work by their American interpreters and shows that the basic terms of postmodern thought are incompatible with definitive claims about the moral status of animals as well as humans Steiner also identifies the failures of liberal humanist thought in regards to this same moral dilemma and he encourages a rethinking of humanist ideas in a way that avoids the anthropocentric limitations of traditional humanist thought Drawing on the achievements of the Stoics and Kant he builds on his earlier ideas of cosmic holism and non anthropocentric cosmopolitanism to arrive at a more concrete foundation for animal rights
