Abstracts of Public Administration, Development, and Environment, 2008 **Planning Singapore** Stephen Hamnett, Belinda Yuen, 2019-05-08 Two hundred years ago Sir Stamford Raffles established the modern settlement of Singapore with the intent of seeing it become a great commercial emporium and fulcrum But by the time independence was achieved in 1965 the city faced daunting problems of housing shortage slums and high unemployment Since then Singapore has become one of the richest countries on earth providing in Sir Peter Hall's words perhaps the most extraordinary case of economic development in the history of the world The story of Singapore's remarkable achievements in the first half century after its independence is now widely known In *Planning Singapore The Experimental City* Stephen Hamnett and Belinda Yuen have brought together a set of chapters on Singapore's planning achievements aspirations and challenges which are united in their focus on what might happen next in the planning of the island state Chapters range over Singapore's planning system innovation and future economy housing biodiversity water and waste climate change transport and the potential transferability of Singapore's planning knowledge A key question is whether the planning approaches which have served Singapore so well until now will suffice to meet the emerging challenges of a changing global economy demographic shifts

new technologies and the existential threat of climate change Singapore as a global city is becoming more unequal and more diverse This has the potential to weaken the social compact which has largely existed since independence and to undermine the social resilience undoubtedly needed to cope with the shocks and disruptions of the twenty first century The book concludes however that Singapore is better placed than most to respond to the challenges which it will certainly face thanks to its outstanding systems of planning and implementation a proven capacity to experiment and a highly developed ability to adapt quickly purposefully and pragmatically to changing circumstances **The New York Times Index** ,2008 **Guide**

to the Nature Treasures of New York City George N. Pindar,Mabel H. Pearson,George Clyde Fischer,1917 **Iconic Skyline Changes** Amelia Khatri,AI,2025-02-19 Iconic Skyline Changes examines how cityscapes have transformed into the towering skylines we know today It explores the architectural historical and social forces driving these changes The book reveals how technological advancements like steel frame construction enabled the creation of modern skyscrapers It also analyzes how economic factors and political ambitions influence urban expansion shaping our urban landscapes The book argues that skylines reflect societal values technological capabilities and economic priorities Beginning with fundamental concepts of urban planning and architectural design the book progresses through case studies of iconic skylines around the world By examining these case studies the reader gains insights into how cultural movements impact building design Ultimately the book connects urban development to broader historical and cultural trends Readers will gain a deeper understanding of urban history and the drivers behind architectural innovation while discovering how urban designers are creating more sustainable and equitable urban environments *Territory* David Gissen,2010-05-24 Advancing relationships between architecture and nature this work emphasises the simultaneous production of architectural objects and their surrounding environment It enables the various geographical patterns effects and sensations within architectural and urban experience It features contributions from geographers historians and theorists **Building in the Garden** Stephen White,1998 A fully illustrated record of the architectural and environmental concerns of the leading architect Joseph Allen Stein One of the most influential architects to work in India he was awarded the Padma Shri by the Indian Government

City and Nature Trausti Valsson,2000-05 Reykjavik more than most other cities was formed in a close interplay with nature which in earlier times made this city and its surrounding nature a close unity The book suggests a method to achieve this integration again Western thinking still sees binary pairs like e g city and nature and house and garden as opposites The book explains that these pairs contrary to belief complement each other Their union therefore actually elevates cities and architecture to a higher level **The Publishers Weekly** ,2009 □□□□□ ,2009 [The Gardens of Roberto Burle Marx](#) Sima Eliovson,1991 The great Brazilian landscape architect s bold use of striking plant materials made him the most influential designer since Gertrude Jekyll This study done with Burle Marx s cooperation traces the roots of his artistic vision and illustrates the plants he grew for use in his own designs Publisher s description *The Nature-study Review* ,1921
