The Wind The Kite The String:

The Wind, the Kite, the String Edwin Willwerth, 2007-12 Two great writers and their books that have had an influence on me in the writing of this book are Jonathan Swift's 1667-1745 and John Bunyan's 1628-1688. Jonathan Swift's masterpiece titled *Gulliver's Travels* was an allegorical attack on the hypocrisy of the human behavior that he witnessed in almost every level of life in England, especially on the political stage. John Bunyan was the author of another famous allegorical book about a soul in search of salvation, *Pilgrim's Progress*. I do not believe this book will in any way approach the level of these two great masterpieces, but like Swift and Bunyan, I too have some comments about the behavior of my fellow Spacelanders as I like to refer to them. What do they really believe in? What have they committed and dedicated their lives to? Because I believe the answers to these questions are the determining factors of their behavior. Like all allegorical books, you will need a great imagination. But as Oscar Wilde said, Imagination is a quality given man to compensate him for what he is not, and a sense of humor was provided to console him for what he is. Edwin Willwerth has been married for over fifty years and is the father of three children. He was a high school mathematics teacher for thirty years. Besides teaching in several public and private schools within the United States, he has also taught in Paraguay for one year, Nepal for two years, and China for six months. He has been very active in his local church, serving for a number of years as a Sunday School teacher and later as head of the Sunday School Department. He was the Missionary Director within his church for several years. He has also spent time on Missionary projects in Haiti and Campeche, Mexico.

The Fluid Dynamics Theory for a kite has been created; the flying principle of a kite has been found, and the kite flying stability was analyzed qualitatively. This book gives two calculative methods which can be used as the theoretical foundation of designing and producing a kite, and the methods are the analytic one of characteristic curve and the analytic one of limit mass area ratio. This book provides abundant data which help readers to calculate a kite. If the analytic method for limit mass area ratio is applied, readers may only focus on the basic concepts in this book and are not necessary to concentrate on the illation of the formula.
