The Winner Effect The Science Of Success And How To Use It

Ian Robertson

The Winner Effect The Science Of Success And How To Use It:

The Winner Effect Ian H. Robertson, 2012-10-16 Robertson shows how success causes dramatic changes to brains that make people smarter more focused and more ruthless He reveals how power can be as physically addictive as any drug and able to make people worse not better at succeeding in the future **The Winner Effect** Ian Robertson, 2013-03-01 What makes a winner Why do some succeed both in life and in business and others fail The winner effect is a term used in biology to describe how an animal that has won a few fights against weak opponents is much more likely to win later bouts against stronger contenders As Ian Robertson reveals it applies to humans too Success changes the chemistry of the brain making you more focused smarter more confident and more aggressive And the more you win the more you will go on to win But the downside is that winning can become physically addictive By understanding what the mental and physical changes are that take place in the brain of a winner how they happen and why they affect some people more than others Robertson explains what makes a winner or a loser and how we can use the answers to these questions to understand better the behaviour of our business colleagues employees family and friends ***The Stress Test*** Ian Robertson, 2016-06-16 Why is it that some people react to seemingly trivial emotional upset like failing an unimportant exam with distress while others power through life changing tragedies showing barely any emotional upset whatsoever How do some people shine brilliantly at public speaking when others stumble with their words and seem on the verge of an anxiety attack Why do some people sink into all consuming depression when life has dealt them a poor hand while in others it merely increases their resilience The difference between too much pressure and too little can result in either debilitating stress or enduring demotivation in extreme situations However the right level of challenge and stress can help people to flourish and achieve more than they ever thought possible In *The Stress Test* clinical psychologist and cognitive neuroscientist Professor Ian Robertson armed with over four decades of research reveals how we can shape our brain's response to pressure and answers the question can stress ever be a good thing *The Stress Test* is a revelatory study of how and why we react to pressure in the way we do with real practical benefit to how we live **Celebrating in a PLC at Work®** David T. Chiprany, Phillip Page, 2025-02-11 When leaders foster a culture of frequent specific recognition in their school system it allows collaborative teams to function at high levels In this book the authors demonstrate how celebrating the right work of professional learning communities stimulates the culture shift necessary for successful PLC implementation Using intentional celebrations K 12 leaders can improve collaborative team performance resulting in higher student achievement This book will help K 12 leaders and administrators Understand why celebration is critical to developing a high functioning PLC Create opportunities to celebrate achievements of the right work in all areas of the PLC process Witness how local and system leaders have effectively implemented celebration practices in their PLCs Customize the book's templates and tools based on what will work best for a school or system Utilize reflective questions and journal prompts to enhance the reading experience and application Contents

Introduction Chapter 1 The Power of Celebrating in a PLC Chapter 2 Celebrating A Catalyst for Change Chapter 3 Leveraging Celebrations in Your Leadership Chapter 4 Celebrating a Focus on Learning Chapter 5 Celebrating Collaboration and Collective Responsibility Chapter 6 Celebrating Results Epilogue References and Resources Index
