Intelligence of Apes and Other Rational Beings Duane M.

Rumbaugh, David A. Washburn, 2008-10-01 What is animal intelligence In what ways is it similar to human intelligence Many behavioral scientists have realized that animals can be rational can think in abstract symbols can understand and react to human speech and can learn through observation as well as conditioning many of the more complicated skills of life Now Duane Rumbaugh and David Washburn probe the mysteries of the animal mind even further identifying an advanced level of animal behavior emergents that reflects animals natural and active inclination to make sense of the world Rumbaugh and Washburn unify all behavior into a framework they call Rational Behaviorism and present it as a new way to understand learning intelligence and rational behavior in both animals and humans Drawing on years of research on issues of complex learning and intelligence in primates notably rhesus monkeys chimpanzees and bonobos Rumbaugh and Washburn provide delightful examples of animal ingenuity and persistence showing that animals are capable of very creative solutions to novel challenges The authors analyze learning processes and research methods discuss the meaningful differences across the primate order and point the way to further advances enlivening theoretical material about primates with stories about their behavior and achievements

The Human Difference Michael Robbins, 2023-10-02

From a multidisciplinary perspective grounded in psychoanalysis this book explores the manifestations of mind that distinguish humans from other species culture civilization and destructiveness Psychoanalysis was created by Freud in an effort to understand neurosis and psychosis the names he gave to individual human destructiveness His understanding was limited and incorrect because the science of evolution and the disciplines of sociology and cultural anthropology were in their infancy when he formulated his ideas He did not comprehend that destructiveness is qualitatively different in humans than in other species and he ignored the problem of how biological instincts become mental processes These limitations left psychoanalysis with one of its most perplexing unsolved problems the mysterious leap from mind to body This book explains how neoteny the prolonged period of postnatal immaturity that distinguishes humans from other animals requires and enables complex learning from caregivers It is the knowledge acquired from this learning and its intergenerational transmission that links the biological theory of evolution with the psychosocial theory of psychoanalysis and explains how the human species is unique This book will be of interest to those who want to learn about how integrating the findings of evolutionary science primatology sociology and cultural anthropology with the theory of psychoanalysis expands our understanding of what makes humans unique and its

implications for the future of our species and how it empowers us to influence the destiny of humankind *Sign Language Interpreting and Interpreter Education* Marc Marschark, 2005-04-14 This text provides an overview of the field of sign language interpreting and interpreter education including evaluation of the extent to which current practices are supported by research and will be of use both as a reference book and as a textbook for interpreter training programmes
