A Field Guide to the National Wetland Plant List Steve Chadde, 2012-12-31. A Field Guide to the National Wetland Plant List is an up to date reference to the wetland indicator status ratings for nearly 7 000 plant species of the United States and will be useful to anyone conducting wetland delineation studies or performing ecological research in wetland habitats. The ratings indicate a species likely presence or absence in wetlands in one of five categories: Obligate Wetland Plants (OBL), Facultative Wetland Plants (FACW), Facultative Upland Plants (FACU), and Upland Plants (UPL). The Guide incorporates the 2012 version of the National Wetland Plant List (NWPL) which refined the earlier ratings. Also the new ratings are based on the plant's wetland status within broad ecological regions, eight of which are included in the Guide: Eastern United States (AGCP), Atlantic and Gulf Coastal Plain (EMP), Eastern Mountains and Piedmont (MW), Midwest (NCNE), Northcentral and Northeast (Western United States), Alaska (AK), Alaska (AW), Arid West (GP), Great Plains (WMVC), Western Mountains, Valleys and Coast. The eight included regions cover the lower 48 states and Alaska; excluded from this Guide are wetland ratings for plants of Hawaii, the Pacific Islands, and the Caribbean region.

Professor Tiner primarily focuses on plants, soils, and other signs of wetland hydrology in the soil or on the surface of wetlands in his discussion of *Wetland Indicators*. Practicing and aspiring wetland delineators alike will appreciate *Wetland Indicators'* critical insight into the development and significance of hydrophytic vegetation, hydric soils, and other factors. Features: Color images throughout illustrate wetland indicators. Incorporates analysis and coverage of the latest Army Corps of Engineers delineation manual.
