Understanding Neighbourhood Dynamics New Insights For Neighbourhood Effects Research:

Understanding Neighbourhood Dynamics Maarten van Ham, David Manley, Nick Bailey, Ludi Simpson, Duncan Maclennan, 2012-09-27 This rare interdisciplinary combination of research into neighbourhood dynamics and effects attempts to unravel the complex relationship between disadvantaged neighbourhoods and the life outcomes of the residents who live therein It seeks to overcome the notorious difficulties of establishing an empirical causal relationship between living in a disadvantaged area and the poorer health and well being often found in such places There remains a widespread belief in neighbourhood effects that living in a poorer area can adversely affect residents life chances These chapters caution that neighbourhood effects cannot be fully understood without a profound understanding of the changes to and selective mobility into and out of these areas Featuring fresh research findings from a number of countries and data sources including from the UK Australia Sweden and the USA this book offers fresh perspectives on neighbourhood choice and dynamics as well as new material for social scientists geographers and policy makers alike It enriches neighbourhood effects research with insights from the closely related but currently largely separate literature on neighbourhood dynamics Neighbourhood Effects or Neighbourhood Based Problems? David Manley, Maarten van Ham, Nick Bailey, Ludi Simpson, Duncan Maclennan, 2013-06-26 This edited volume critically examines the link between area based policies neighbourhood based problems and neighbourhood effects the idea that living in disadvantaged neighbourhoods has a negative effect on residents life chances over and above the effect of their individual characteristics Over the last few decades Western governments have persistently pursued area based policies to fight such effects despite a lack of evidence that they exist or that these policies make a difference The first part of this book presents case studies of perceived neighbourhood based problems in the domains of crime health educational outcomes and employment The second part of the book presents an international overview of the policies that different governments have implemented in response to these neighbourhood based problems and discusses the theoretical and conceptual processes behind place based policy making Case studies are drawn from a diverse range of countries including the United Kingdom The Netherlands Australia Canada and the USA **Rethinking Neighborhoods** William A.V. Clark, 2024-05-02 Although neighborhoods are sometimes perceived as just a backdrop to our lives there is considerable evidence that they are central to our sense of wellbeing and in the functioning of the city Rethinking Neighborhoods is about these areas of geography what we know about how neighborhoods function why they matter and how we chose where to live **Handbook of Urban Segregation** Sako Musterd, 2020-03-28 The Handbook of Urban Segregation scrutinises key debates on spatial inequality in cities across the globe It engages with multiple domains including residential places public spaces and the field of education In addition it tackles crucial group dimensions across race class and culture as well as age groups the urban rich middle class and gentrified households This timely Handbook provides a key contribution to understanding what urban segregation is about why it has developed what its consequences

are and how it is measured conceptualised and framed *Cities, Economic Inequality and Justice* Edwin Buitelaar, Anet Weterings, Roderik Ponds, 2017-07-28 Increasing economic inequality in cities and the spatial translation of that into more segregated neighbourhoods is top of the political agenda in developed countries While the overall living standards have increased in the last century the focus has now shifted from poverty to economic differences with a particular focus on the gap between the very poor and the ultra rich The authors observe a common view among policy makers and researchers alike that urban economic inequality and segregation are increasing that this increase is bad and that money and people in the case of segregation need to be redistributed in response In six compact chapters this book enriches and broadens the debate Chapters bring together the literature on the social effects of economic inequality and segregation and question whether there are sizable effects and what their direction positive or negative is The often conflated concepts of economic inequality and segregation and social injustice is disentangled and the moral implications are reflected on The book is essential reading for students and academics of Planning Theory Planning Ethics Urban Geography Urban Economics Economic Geography and Urban Sociology *Ethnic Spatial Segregation in European Cities* Hans Skifter Andersen, 2019-05-15 This book provides the first in depth interpretation of how to understand the causes of ethnic residential segregation across Western European countries and the USA In many countries ethnic minorities have obtained low quality housing and may be concentrated in certain parts of cities This book asks to what extent ethnic segregation can be assigned to special preferences for housing and neighbourhoods among ethnic minorities Is it the behaviour of the native majority or is it a result of housing and urban policies Ethnic segregation differs greatly across European countries and cities Chapters discuss the extent to which these differences can be explained by welfare state systems levels of immigration and the ethnic composition of minorities The book also considers the impact of housing policy and the spatial structure of urban housing markets created by urban planning and policies This book will appeal to teachers students and researchers working with segregation urban sociology and geography It will also be valuable to civil servants in central and local governments who are working with measures to combat ethnic segregation and its consequences *Environment & Planning*, 2012

about the causal mechanisms which produce them their relative importance in shaping individual s life chances the circumstances or conditions under which they are most important or the most effective policy responses Collectively the chapters in this book offer new perspectives on these questions and refocus the academic debate on neighbourhood effects The book enriches the neighbourhood effects literature with insights from a wide range of disciplines and countries
