Keywords In and Out of Context Betsy Van der Veer Martens, 2023-06-03 This book explores the rich history of the keyword from its earliest manifestations long before it

appeared anywhere in Google Trends or library cataloging textbooks in order to illustrate its implicit and explicit mediation of human cognition and communication processes The author covers the concept of the keyword from its deictic origins in primate and proto speech communities through its development within oral traditions to its initial appearances in numerous graphical forms and its workings over time within a variety of indexing traditions and technologies The book follows the history all the way to its role in search engine optimization and social media strategies and its potential as an element in the slowly emerging semantic web as well as in multiple voice search applications The author synthesizes different perspectives on the significance of this often invisible intermediary both in and out of the library and information science context helping readers to understand how it has come to be so embedded in our daily life This book Provides a thorough history of the keyword from primate and proto speech communities to current times Explains how the concept of the keyword relates to human cognition and communication processes Highlights the applications of the keyword both in and out of the library and information science context

Innovative Practices in Teaching Information Sciences and Technology John M. Carroll, 2014-01-27 University teaching and learning has never been more innovative than it is now This has been enabled by a better contemporary understanding of teaching and learning Instructors now present situated projects and practices to their students not just foundational principles Lectures and structured practice are now often replaced by engaging and constructivist learning activities that leverage what students know about think about and care about Teaching innovation has also been enabled by online learning in the classroom beyond the classroom and beyond the campus Learning online is perhaps not the panacea sometimes asserted but it is a disruptively rich and expanding set of tools and techniques that can facilitate engaging and constructivist learning activities It is becoming the new normal in university teaching and learning The opportunity and the need for innovation in teaching and learning are together keenest in information technology itself Computer and Information Science faculty and students are immersed in innovation The subject matter of these disciplines changes from one year to the next courses and curricula are in constant flux And indeed each wave of disciplinary innovation is assimilated into technology tools and infrastructures for teaching new and emerging concepts and techniques Innovative Practices in Teaching Information Sciences and Technology Experience Reports and Reflections describes a set of innovative teaching practices from the faculty of Information Sciences and Technology at Pennsylvania State University Each chapter is a personal essay describing practices implemented by one or two faculty that challenge assumptions and push beyond standard practice at the individual faculty and classroom level These are innovations that instructors elsewhere may find directly accessible and adaptable Taken as a set this book is a case study of teaching innovation as a part of faculty culture Innovation is not optional in information technology it inheres in both the disciplinary subject matter and in teaching But it is an option for instructors to collectively embrace innovation as a faculty The chapters in this book taken together embody this option and provide a partial model to faculties for reflecting on and refining their own collective culture of teaching
