Understanding The Placebo Effect In Complementary Medicine Theory Practice And Research 1e:

Complementary Medicine and Health Psychology Anna van Wersch, Mark Forshaw, Tina Cartwright, 2009-10-16 This unique book is the first to bring together the world of health psychology with that of complementary and alternative medicine CAM. The authors draw on their wealth of experience as health psychologists to explore the relationship between health psychology and CAM and look at how an understanding of one can be used to inform the other. Through an open minded but rigorous approach to CAM the authors identify where psychology can help to answer some crucial questions such as why CAM sometimes appears to work why sometimes it does not and why some people are drawn to it and others not. Key topics covered include models of the person health beliefs and experimental psychology placebo research methods in CAM stress coping and stress management pain and chronic illness communications and interactions between client and therapist. While CAM has often been dismissed out of hand by scientists the authors maintain that it deserves attention as a psychological phenomenon alone regardless of the actual efficacy as understood by existing research. This book's insightful observations on contemporary meanings of health and illness and the future of CAM and health psychology make it important reading for all psychologists and health professionals.

Snake Oil Science R. Barker Bausell PhD, 2009-07-31 Every year millions of people flock to complementary and alternative therapists offering a vast array of treatments ranging from acupuncture to biofeedback to urine injections. Millions more purchase over the counter alternative medications such as glucosamine herbs and homeopathic remedies. While consumer motivations for turning to complementary and alternative medicine CAM vary there is one common element among them all a belief in their effectiveness. This belief appears to be prevalent among all elements of society from scientists and physicians to celebrities such as Prince Charles and Oprah Winfrey to clerical workers and senior citizens. Do these therapies actually work? And if they work how do they work? This book is about the science of complementary and alternative medicine about how that science is conducted how it is evaluated and how it is synthesized to arrive at a bottom line conclusion about whether CAM therapies work. It is also about the phenomenon of the placebo effect and the extent to which it is at play in a given CAM therapy's efficacy. Are CAM therapies in fact nothing more than creatively packaged placebos? In exploring this question Barker Bausell provides an authoritative and engaging look at the nature of scientific evidence and at the logical psychological and physiological impediments that can confound such evidence in the world of CAM research. Ultimately the book is not so much opposed to CAM as to the shoddy science upon which CAM claims are based and in fact it closes with a chapter about how one might maximize the placebo effect that Bausell asserts is the main ingredient of most CAM therapies. For general readers students and professionals e.g. clinicians who are routinely asked by their patients for CAM recommendations the book is a learned witty examination not just of the scientific process as it is applied to CAM but also of the wonders of the human mind/body system.

The Life of a Galilean Shaman Pieter F. Craffert, 2008-01-01 Historical Jesus research remains trapped in the positivistic historiographical framework from which it emerged more than a hundred and fifty years ago This is confirmed by the nested assumptions shared by the majority of researchers These include the idea that a historical figure could not have been like the Gospel portrayals and consequently the Gospels have developed in a linear and layered fashion from the authentic kernels to the elaborated literary constructions as they are known today The aim of historical Jesus research therefore is to identify the authentic material from which the historical figure as a social type underneath the overlay is constructed Anthropological historiography offers an alternative framework for dealing with Jesus of Nazareth as a social personage fully embedded in a first century Mediterranean worldview and the Gospels as cultural artifacts related to this figure The shamanic complex can account for the cultural processes and dynamics related to his social personage This cross cultural model represents a religious pattern that refers to a family of features for describing those religious entrepreneurs who based on regular Altered State of Consciousness experiences perform a specific set of social functions in their communities This model accounts for the wide spectrum of the data ascribed to Jesus of Nazareth while it offers a coherent framework for constructing the historical Jesus as a social personage embedded in his worldview As a Galilean shamanic figure Jesus typically performed healings and exorcisms he controlled the spirits while he also acted as prophet teacher and mediator of divine knowledge
