This new series of exercises enables tuba players to achieve advanced rapid and step by step progression in embouchure and as a result in their technical precision and speed so as to attain virtuosity in the two different areas covered by the book. In particular, this enables step by step development and progression in embouchure improvement and increased confidence in attack, improvement and increased confidence in all register, improvement and increased confidence in control in legato, increased confidence in moving from one register to another, and in leaps of over two octaves, increased technical precision and speed, attainment of virtuosity in the two areas covered by the book. My advice is to tackle these exercises starting at a comfortable pace 75-80 on the metronome and then to gradually pick up speed in order to reach the maximum attainable pace. Another idea might be to practice in major and minor keys on alternate days or to play in the ordinary way on one day and the opposite the next. Everything is at the sole discretion of the player. As always, I leave full freedom of execution up to tuba players who want to try their hand at this new series of daily exercises for advanced rapid and step by step progression as part of their musical training.
