

**Precautions,
6-pounder.**

- C-48.** (1) The following precautions shall be observed in using the 6-pounder gun for line throwing:
- (a) Make sure the projectile is seated in the end of the cartridge.
 - (b) Attach the line to the eye of the shank with three loose half-hitches.
 - (c) Wet end of line for about 6 feet to prevent burning.
 - (d) Lead line clear of all obstructions. Do not pay out much slack from the faking box or canister.
 - (e) Place faking box or canister to leeward, a few feet to the rear of muzzle of gun.
 - (f) Do not use deteriorated lines. They must be very carefully faked down or wound on the rewinding machine; otherwise they will be likely to break.
 - (g) Personnel should stand clear of the firing gun and line.
 - (h) It is important that the 6-pounder recoil cylinders be properly filled as the heavy projectile will cause considerable recoil.
 - (i) Considerable allowance must be made for drift of the line in a cross wind.
 - (j) Elevate the gun approximately 30°. (See art. G-81.)
