

CINEWINDS

What's New in CineWinds 1.1?

New Patches

CineWinds CORE

- Oboe 2 Articulations
- Oboe 2 True Legato

CineWinds PRO:

- Contrabass Clarinet Articulations

We've also included old school **Short/Long Patches** for people who may want more of a traditional setup. These consist of sustain patches with no legato and short patches that are one length only with velocity sensitive dynamics. A lot of people work this way so we decided to take the liberty of setting up these presets. They utilize the same samples and have the exact same skin as the articulations patches - we just changed the settings on the mapping page to save time for anyone who'd like the patches set up this way.

Legato Volume

We've added a legato volume knob to the Settings page (in addition to the current Legato Speed knob) to allow you more control over the way the legato sounds. We've set them to a position we believe will be effective for most applications, but you may want to tweak them depending on the type of line you are trying to program.
