

VARIOUS INFORMATION SYSTEM USED IN SBI BANK AND ITS FUNCTIONALITY

Banks usually use core banking software products(CBS) that process daily banking transactions like deposits, withdrawals, account opening, loans, etc. SBI doesn't use an ERP but uses a core banking product called Bancs implemented by TCS. State Bank of India (SBI) selected TCS BaNCs to customize the software, implement the new core system and provide ongoing operational support for its centralized information technology.

The implementation of the Core Banking solution from TCS BaNCs at SBI and its affiliate banks represents the largest centralized core system implementation ever undertaken. The overall effort included the conversion of approximately 140 million accounts held at 14,600 domestic branches of SBI and its affiliated banks.

New Digital Payment System

Making digital payment services easily accessible to government employees through Employees' State Insurance Corporation (ESIC), the State Bank of India (SBI) has inked a Memorandum of Understanding (MoU) with ESIC for electronic payment-related services to all beneficiaries.

The move is likely to reduce time lags in digital payments in a secure mode. According to the agreement, SBI will provide e-payment services directly to bank accounts of all ESIC beneficiaries and payees without any manual intervention as an integrated and automated process. It will thus make SBI provide e-payment integration with the Enterprise Resource Planning (ERP) processes of ESIC through its Cash Management Product (CMP) e-payment technology platform.

The e-payment integration would affect statutory benefit payments to ESIC beneficiaries as well as other payees with easy and timely transactions that will help in eliminating mistakes and errors caused by repetitive and manual data entries.

The e-payment services by SBI acts as a payment aggregator that facilitates online payments of government dues by the customers of any public/ private sector banks by using the payment gateway of SBI.
